Dear George,

I hope this finds you hale and hearty!

Happy New Year!

Just got back from Sipadan where I have been taking skin samples for my genetic work and re-starting the tagging programme for Sipadan turtles with the Sabah Wildlife Department.

I had used 21 tags (nos. 405-Z to 425-Z) of the 100 tags that you gave me to tag the right front flipper of female green turtles that nested in Sipadan from 24 to 31 Dec 1999. All turtles nesting from 1 Jan 2000 have been tagged with the Wildlife Dept tags. Do let me know if you have received reports that your tag numbers were spotted.

Thanks!

Warm regards,
Pushpa
