

## STUDENTS CONDUCT TURTLE HEALTH ASSESSMENTS ON LANAI

**H**awaiian green sea turtles living off the east coast of Lanai appear to be healthy and well fed, according to Marc Rice, director of the HPA Sea Turtle Research Program. In mid-September, Rice and George Balazs, leader of the Hawaiian Marine Turtle Research for the National Marine Fisheries Service (NMFS), Honolulu Laboratory, led a team of five HPA students to capture, measure, weigh, and conduct health assessments on Lanai turtles.

HPA student assistants were Rebecca Emory, Liz Evans, Brenden Lavender, Jill Quaintance, and Nick Quaintance. Arjun Clary '95 and Mike Coelho '77, enforcement officer for the Hawaii Department of Land and Natural Resources (DLNR), supported the group.

This was the first time since 1992 that the NMFS examined the Lanai turtles. The team spent a week working the outer shallows near White Rock and at Federation Camp, located a few miles to the north.

"We swam out about 300-400 yards to capture turtles and then transported them back to shore on tubes for measuring, weighing and health assessment," said Rice. "We captured 48 turtles with four of those being recaptures of turtles that were tagged in 1992. We saw only one case of fibropapilloma tumors, which was marvelous. The rate of infection was much higher during earlier expeditions."

Fibropapillomatosis is characterized by external and internal fibrous, non-cancerous tumors that can cause blindness, difficulty breathing, and increased susceptibility to entanglement, parasites and other diseases. Although Rice noted it is dangerous to declare any health trends based on this small sample, it is encouraging.

Team members also walked the more than three-mile length of Polihua Beach to check for any signs of turtle nesting. "This had been reported as an important nesting beach in historic times," said Rice. "If it was indeed a nesting beach, we found that it doesn't appear to be one now."

After work, the students visited several historic sites, including the Luahiwa petroglyph field, Kaunolu Bay in southwest Lanai, and Kahikili Leap, the world-famous

cliff diving site and location of the recent Red Bull World Championship Cliff Diving Competition.

HPA student participation in this study was made possible through a unique partnership with the NMFS. Since 1987, students in the school's marine science program have worked with NMFS on a turtle research and monitoring project in West Hawaii. The work has grown over the years in scope, magnitude, and importance to overall species conservation.

"Our students did a great job and the people on Lanai were extremely helpful and friendly," said Rice. "It was a great trip and we will probably return for a follow up in about six months."

## ELNORA HIATT TEACHER EXCELLENCE AWARD

It is with great honor and appreciation that HPA announces the receipt of a \$3,000 gift in support of faculty excellence at the HPA Middle School. Current parent Jerry M. Hiatt has graciously created the Elnora Hiatt Teacher Excellence Award in honor of his mother who worked tirelessly throughout her career as a teacher.

This award has been established to recognize a Middle School teacher who has made an impact on the growth of Middle School students through his or her teaching. Mr. Hiatt writes, "My point in making the award is to recognize the fact that teachers are often overworked and underpaid and I would like the teacher who receives the gift to feel no regret or guilt about spending the money on himself or herself."

He goes on to say, "I would like to take this opportunity to thank our HPA community for the excellent job they have done with each of our children. They continue to grow and learn every day and I believe that is due to the dedication of the teachers whom they have been fortunate to have."

As requested by Mr. Hiatt, the recipient will be selected by the Middle School principal, and the award will be presented at the end of the school year during a formal ceremony. We are extremely appreciative of his commitment to provide such a generous gift to a deserving Middle School teacher.
