From: Marc Rice <mrice@hpa.edu>
To: George Balazs <gbalazs@honlab.nmfs.hawaii.edu>
Subject: Re: Excel Spreadsheet for swimming speeds of FFS and Rose At
Greens

I was calculating the speed of 2 mph based on only the surface time, 48% of total. So, that would mean that they should have been traveling some form virtually 24 hours a day in order to knock the necessary rate to 2 kmph.

Cots of people in the water feeding.

note mailed 8/23/04

Saw "Yuki" Japanese man who daily brings Japanese natural tourists to Honolulu to feed them to the turtles.

note no email

Two children from his group poured children bucket of water on L1. I told them no. A short time later Yuki himself walked out of water with large bucket of sea water and proceeded to pour it high above over L3.

I proceeded to express my disappointment in him doing this - in view of all the literature - Japanese sealed - etc I have provided him and talked to him about.

Sunset and beyond - many photos
of sunset portrait w/ 2 kids skyler
and Alexa feeding Ulva.
Via Howlandi Cam Yoshi &
others in Osaka saw me
in lime green t-shirt taking
the pictures.

Dinner at Chops again.

L1 on beach gone ~ 8pm.
No other turtles out this night.

Cloudy (dirty) water cell often in
right pocket by rocks,

Very cold water under the sand -
need to measure
* need Temp Logger set up for rapid.

overnight

Rained hard ~ 7 pm. Short ⁽⁹³⁾ duration.

Thursday
9/16/04

after dinner I drove to
Foodland - Sunset beach
(just beyond Waimea Bay).

Bought some food. At ~ 10 pm I
took right-of-way to Allington Rock
beach - walked to look for
"Atlantis" (named after a dive site
offshore by North Shore Diving).

Scanner
PO PIT

Three turtles on the beach = one adult
mole by limestone ^{under} rock, an adult
on clog to water - went back in;
one juvenile close to water photo.
Mole under rock had returned to
sea when I walked back.
note - none had visible tumors.
However the juveniles (right
and maybe left) eyes looked
strange - maybe aggression.

To bed about 1145 pm

Friday
9/17/04

up about 730 AM.

Large no visible work I started
to haul out ~ 10 AM.

Dear George-San,

Thank you very much for your kindness.

Please find appended MS-Word file.

I prepare for new Invoice.

I modified old Invoice "JJ 133F-04-SE-083" which I prepared for Naoki and sent you last summer.

What I did this is just change the date and paste Naoki's electric signature on it.

Would you check and correct it, please?

Anyway, I enjoy the view of the turtle basking beach on the network.

When Futoshi checked your email and found your web-site yesterday, it was too

dark.

About two hours ago I accessed the web-site again with Futoshi and other guys

in our office. It was just before the sunset on the beach.

Besides some people and turtles, we found a fidgety guy wearing a lime green

T-shirt with a round shape back print on it. He seemed to take pictures.

Everyone here said, 'He looks like George! That's it!'

Is the guy on the beach really you, George?

Tonight, we will have a party.

There Futoshi and Fumiko are supposed to report and introduce us their training in

Hawaii. I am looking forward it.....

with my best,
Yoshi

9/18/04 Saturday

I put a reader in a dry bag and walked around in knee deep water reading hind flipper tags. There were about 11 total. I was able to pick up pit tags in 6. Strangely I was only able to find ONE of the 6 on the Honulani summary tagging list. Here are the numbers it will be interesting to see historicals for these- who are they where were they tagged?

Cody if Shawn doesn't have time to do this, you do it please. At least the historical part-- I'm sure she will want to do entries of the resights herself later on.

from Shawn

**WILL LEAVE HISTORICALS IN YOUR BOX

9/18/04 ~~ALL DAY~~
Saturday no turtles out basking -
not seen earlier by camera.

Stood out in water taking digital
pictures - some video also.

Saw Pat Johnson & Niece Julie from London.
Pictures taken of visitor Noko.
Pictures of visitor Noko.

First time I saw people (mainly
kids) throwing handfuls of
Ulva to turtles close to shore - like
"feeding the pigs"

Photo of Wife/husband from China giving
Jay (lost log) - her little fingers
had been bitten.

Saw Yuki - this time he didn't
go in to feed, only his slights did.
However, plenty green dangling strings
of Ulva above the water where
turtle can't get it. Clearly he
is not properly briefing people
before bringing them here.

(105)

Drove through dense traffic
depart ~ 3:30 pm. Arrived ~ 4:45 pm
Monk Seal Tag orange
has been on the beach right
pocket since ~ at least 6:30 AM
today when Shaun first saw it
by camera. Adult ♀ recently mottled
not seen for a month, according to
Thea. But prior to that seen
N. shore oahu - Malaekahana.
Seal originally tagged on Kauai -
had a hook removed. HPD

3 cars parked when I arrived -
put up yellow "police line" flagging
tape. Digital & video stills
of seal - same appearance of being
pregnant. L7 on beach
nearby. (Photo taken by Shaun and Jo Ann Niece
11 years old same thru sunset.)

Monk Seal still there at 9 am, but
not at 11:30 am.

Dinner at Cholo's.

~ 9:30 pm went to Alligator Beach
very low tide. Found 2 toskers

(106)

Saturday - Typical - "As the
morning progresses more
people arrived -> 9:30 AM - more at
11 AM - and more turtles arrive.

More
surf
too as
deposit
surf is up.

Clean
water in
~~water~~ P.1111
pocket

10/1/04 Both juveniles - no PIT tags, (107)
Friday night are with no tumors close to
water^{wave} wash; the other T53 many
tumors tracks present where it
clearly crawled up through intertidal
zone to drier area. Digital ^{Picture} of
this turtle. Tumor on dorsal right
front flipper with <10 lbs, test swabbed
around it but not around flippers. Left
on so not to disturb. Neither
turtle went back into the water.
Bed ~ 11:30 pm

OVERNIGHT

10/2/04 Same rain at night.
Saturday Up ~ 7:15 pm. Sunny
clear, light cloud cover.
SURF up enough for surfers to arrive.
Changed the visitor log in the tree to
a new one, old water decaying.
2-3 turtles being fed.

10:50 pm L2 crawled out
but only for 5 min, near
wave wash, then returned to the
water.

A theme (but no evidence of
'it seen today) =

it
people upset with
other people over this, that
or the other (often reversals)
while the turtles couldn't see
to care less??

Need - Modern Portable Toilet

109

10/2/04 Spoke at length with
Saturday Joan Peck's daughter.

1253 - 101 pm ^{no MT soap} large
♀ thick - prolapse to
♀ cloaca came out
far, crawled toward people
taking picture. They turned
to go back. "Spooked" when
man ran slowly close by.

at 215 pm - 8 ^{people} IW near ship

18 on Beach

10/19/04 several times they said don't touch -
 Sat. they or didn't listen. I
 walked down to tell them there are
 signs all over saying don't touch the turtles -
 and that people on the beach are
 getting very upset with them. Husband
 walked up to me later, said
 there were no signs from the direction
 they walked in from - I told him
 there were at least 4 double sided.
 Obviously embarrassed they were touching
 when they weren't supposed to and trying
 to justify beach. Said he was in
 the USCG - had flown NOAA people around
 a lot. I emphasized to him that
 my verbal telling family was solely to
 prevent escalated altercation with
 2 men who were yelling at them from
 the beach - since high emotions can
 exist when turtles get touched.
