Question - Sizes classes of this trip vs earlier trips?
Higher due to holes in net, and dropping areas that let small turtles escape?

Other Project Updates for this Year

by: Wailana Moses, TNC Administrative Outreach Assistant

MO'OMOMI— Turtle Monitoring: Monitoring of the Green Sea Turtles during their nesting season lasted from May to November. 36 nests were sighted with 12 having hatchlings. A Big Mahalo to volunteers Joan Aidem, Forrest & Fely Peterson, Lij Macmillan, Bill Feeter, Michael Grinnell, and Scot Schafer for diligently going out weekly to monitor. **Beach Clean-ups:** A total of 106-42 gallon trash bags of 'Opala (rubbish) were removed from kawa'aloa beach this year. Every year volunteers dedicate their time to making Kawa'aloa beach safer for nesting turtles and visiting monk seals. **Kiawe Removal:** An estimated 1.33 acres of kiawe (*Prosopis pallida*) was removed from Moomomi's intact native habitat near Kaiehu Point. The intact native habitat provides an abundant native seed bank that allows the bare areas to regenerate naturally. Removing the kiawe also takes away hiding places for predators that have been killing the Wedge-tailed Shearwaters (see "Update on the 'Ua'u Kani" article).

KAMAKOU, KAMALO, KAPUALEI & KAWELA— Weed Removal: Staff, volunteers and partners are still working very hard to control or eradicate invasive weed species from Kamakou and Kamalo. This year an estimated 6,362 *Cleodemia hirta* (cousin to *Miconia*), 442 Blackberry (*Rubus argutus*), 4 *Tibouchina herbacea* (another cousin to *Miconia*), 6,674 Strawberry guava (*Psidium cattleianum*), 72 Paperbark (*Melaleuca quinquenervia*), 46 New Zealand Flax (*Phormium tenax*), 11 Karakanut (*Corynocarpus laevigata*), 2 Christmas berry (*Schinus terebinthifolius*), 1 acre of White Ginger (*Hedychium coronarium*), and a whole bunch of other weeds were removed. **Kamakou Live Pig Traps:** A total of 17 pigs were captured and distributed to staff and community members. **Goat Population:** In Spring 2002, 1,360 goats were counted at Kamalo and Kapualei. On January 11, 2005, staff conducted the first aerial goat count at Kaweia/Makolelau and sighted 965 goats. Many herds ran beyond the survey area before they were counted. A combined total of 2,325 goats were sighted and recorded. Presently, I believe that the goat population is well over 2,500. **Kamalo/Kapualei Fence:** TNC staff is doing quarterly maintenance on the 5 mile fence. We continue to see a dramatic change above the fence where the vegetation is growing back. Below the fence is still being
