FRIDAY

3-4 turtles laying motionless
on the bottom where "rubbing rock"
used to be. one captured.

Scarlett following John - due to squid
juice. Need to take some ourself.

A turtle, no tags, came close to John,
but we couldn't catch it.

We circled twice, over a "canyon" east
and west.

At Canyon to the east, near squid
end, we came across a large
brown-water area. Much stirred up
brown silt (new silt bottom areas
since INKI?). Large yellowish
c.m. came from out of hirk. Was
it stirring up bottom? or?
