Scuba firm closes down in wake of fatal dive

Atlantis Reef Divers has closed its scuba-diving operation in the wake of a fatal accident two months ago.

The company had suspended operations after a Japanese tourist died Aug. 14 some 200 yards off Fort DeRussy Beach. Akemi Hoshino, 24, had apparently been left in the water when a group of eight students reboarded the Atlantis dive boat and returned to shore.

Atlantis said negative publicity surrounding the death made it impractical to resume dive operations.

In April, Japanese tourist Tomoko Yanase, 54, drowned while diving in 100-foot-deep water off Waikiki during an Atlantis outing.

To: Shawn Murakawa
Subject: It may very well turn up in this mess I call my office

----- Message Contents -----

Here's the message!

He seemed okay with the outcome. His address is 94-1049 Eleu Street, Waipahu 96797, 676-9336.

Was he satisfied with your feedback? Also, did we get, or could we get, mailing or phone, so we can tell him when/where tagged? People usually really like that when reporting a tag. geo.

N777

I just received a call from Les Moscariello, a dive instructor. He reported seeing a turtle at Fort DeRussy sleeping in the reef. It was about 6 feet deep and 30 yards offshore. He said that it had tumors on the right side of the head and also small ones in the armpit area. It had tag N775 (LFL) and N776 (RFL). He said that it appears to be weak, but didn't like it when he approached it. It is swimming fine. He also said that he saw 8" of fishing line extending from either the tumor or the mouth. He's not sure.

I explained to him that it's better for the turtle to remain in the "wild", but that if it appears "worse" to call us or DOCARE (after hours). I explained that the turtle sounds okay, and that it'll come up to shore if it wants to come and "rest".

BUT- if it doesn't do you still have a computer copy of the message you sent me telling about the tag recovery off Waikiki, man's address, etc.? Sorry.
