To: George Balazs  
Subject: Phone call

----- Message Contents -----

John Kahiapo called to just let us know that he received a call from Leon Thevenin (he knows you). Leon called to report that he sees dogs attacking turtles that are trying to come up and bask at night in Puako (the location is between 100-102 Puako Beach Drive). John said that they told Leon that they can't do much because it's dogs that are attacking the turtles and not people (an enforcement problem). John just wanted to let us know. Leon's phone number 882-7969, address 194 Puako Beach Drive, Waikoloa, HI 96738.

 wed. ARRIVE PUAKO 745 AM. "24 PUAKO BEACH DRIVE"  
 Right of Way, next to Cindy house  
 where I set the warning sign and she installed. Tide  
 low all day - <sup>shallow</sup> (76°F) between Pahoehoe  
 Laya. Walked out and picked up  
 turtles. Relatively easy. None actually  
 seen basking - haul out - but everyone  
 reports this happening - on sand beach shoreline  
 and on rocks. Probably started ~ 1-2 years  
 ago. Q404 tagged and sprayed in  
 morning, then seen later back in shallow  
 resting on bottom. Left Puako ~ 345 PM  
 Depart Kona FL 279 615 PM

Honaurau #1

wed.  
12/21/94

Depart Aloha FL 80 5:30am.

ARRIVE KONA 6:10am. Dollar \$19.88

Drove to McDonalds Kailua Kona 6:50am.

TO Honaurau (20 miles) arrived ~ 8am.

Noted what we thought might be 7 turtles in a <sup>shallow</sup> cove next to boat ramp, ~~near~~ from Kam School Campus. ~ 8:45am laid

200' x 8' net across channel. Caught 10 turtles over the next 30 minutes. Turtles

seem to be feeding in here on closely cropped red (gelidium) and green (ulva) algae. moderate coverage of this on lava in here.

Worked up turtles and released. Lots of tourists - given handouts.

Snorkelled in 10-20' water outside of beach (bagie board kids) on shallow lava. Lots of live, but also dead, coral. Caught 10 more over ~ 2 hours. No smooth-shelled oysters seen from repeated resting. All turtles caught were easily able

wed.

2/21/94 to be approached. Marc

saw 2 surgeonfish cleaning on  
surface of a turtle.

"Kala" Pond said be just south  
Inlet where many turtles previously  
seen, but an I-3 seen today, is  
NAMED \_\_\_\_\_,

Departed at ~ 3pm.

Depart Aloha 4:97 5pm.

George,  
Hope your presentation goes well today. I observed #28 at PBR 24 yesterday at 0900 hours so it is still around. 97 was not available! Below is a note from Bobbie Sullivan:

16 Sep 96  
Hi Marc -

If you see a gap in your turtle dive data for the past 2 mornings, we know why. We saw the turtle with the box on the RIGHT side grazing in the shallows for quite awhile yesterday morning (15 Sep 96 @ 09:48AM). We saw it as we were wading into the water in front of house #40. It was with two other turtles, all munching away on that brownish mossy limu that covers rocks in the shallows (don't know what it's called). The water there was about waist high on us -- about 1 m? We watched for a bit then did our dive. When we waded back out of the water at 10:15AM we noticed that subject turtle was still in the same area, -- still munching away -- but its two buddies had left. Water temp, by the way, was 28C.

Today, Sep 16, we saw the same turtle grazing in almost the same spot at about 12:15PM. Don't know how long it had been there. We watched from the shoreline rocks for about 10 min. It was still there when we left. Water temp in the shallows today at that time was 29C.

-----  
Seems that the rascal may be invading other pastures on occasion.

When are you available to come on over and do the TDRs at Puako?

Marc

Date: Thu, 23 May 1996 15:44:04 -1000  
From: Marc Rice <mrice@hpa.edu>  
To: "George H. Balazs" <gbalazs@honlab.nmfs.hawaii.edu>  
Subject: archival 123/sonic 28

George,

Was down at Puako on Sunday, 5/19 and I checked with the hydrophone but was unable to hear anything. The tide was very low and I would have been surprised to have heard anything.

Today I went down again at 1300 hrs. The tide was quite low again (about .7') but there were turtles in the shallows. When I got out of the car and walked to the edge of the water I was able to make out the green fiberglass on GW (a123/s28). It was right near shore in a shallow depression (1.5') feeding with three other turtles. The tag appeared to be in good condition and in place. The front edge of the sonic was white as though the green sanding resin had been rubbed off or abraded. Since the sanding resin wasn't quite dry when we let GW go, it may have rubbed the stuff off if it went out and settled into a cave as released turtles seem to do sometimes.

Anyhow, it seemed very content remained in the same area for the hour that I was there. I could stand within 10 feet of it and it didn't shy even when it raised its head and spotted me.

When you get back, give me a call and perhaps we can do a SCUBA tag trip to PUAKO next week.

Best,  
Marc

To: "George H. Balazs" <gbalazs@honlab.nmfs.hawaii.edu>  
Subject: Re: archival 123/sonic 28

George,

Welcome back. I had another visual and sonic on #123 on Sunday so it is still coming in to feed. We will await your pleasure with regards to a trip over here.

I am looking at a somewhat unencumbered month of July and want to let you know that I am available for grunt work anywhere if you could use me.

By the way, are you interested in trying a TDR on a Hawksbill?

Say hello to Kim for me and ask her if she ever got the video tape of East Island.

Marc

# KEAWANUI # 12

TUESDAY

29 NOV 94 Depart 6:20 AM FL 88 GHB & P.T.G.B. Arr.  
to Kona. Dollar Car #19.95 (Jeep). Drove to  
Maunalani (Keawani) - Met by Marc, George  
Sandy, students + Channel 4 TV doing contract  
HPAD. Jamie & Bill Perry visited  
for awhile - gave me photo album + enlarger.  
9 AM turtles seen in embayment so  
we deployed net across entrance.  
5 captured. Scott saw a small  
turtle swim right through eye  
of net.

George and divers went out  
while we did not, 3 caught.  
5 HAWAII EXPLORATION ACADEMY students  
showed up.

Depart Kona 5 PM FL 97

## Needs

- LABEL ALL A2 Boxes
- new spray paint
- ✓ - Minda Murphy photo / <sup>8th grade</sup> JULIA DRING photo / ~~Jenny~~ ~~GI~~
- Send Mark Symposium info
- ✓ - Send Danny AA + JAW pop. ~~in press~~
- ✓ - Repair fit tag reader
- ASK SONOTRONICS ABOUT WIRING FOR 9VOLT
- ✓ - \$8 TO Jamie Perry
- Measure stretch mesh =
- ✓ - Map of turtle locations - JULIA
- ✓ - Satellite tracking Minda
