descriptive remarks  
Mouth clean -  
Release @ 1347h.  
Appears that 2 metal tags have been lost.

Yesterday... 11/11/05  
We were out on the cleaning station at 1030 h and remained there until 1400 h. There were 2 or 3 turtles there most of the time but the particular one we were looking for didn't come by. On Sunday, we will be a little less choosy -- we did capture one previously tagged turtle that was there.. data sheet attached. The reason we did this was to give us a little practice catching in 35 feet of water (we don't have the students do this any more) and to get some idea of where the customers are coming from. We figured that we could find out where this turtle was tagged along the Puako shoreline. Anyhow, it was a good day, and we had no visitors or observers that we know of. The critters out there at the cleaning station look healthy but skinny... typical Puako body condition.

U Aiko Coa
