Subject: Re:

*f the ones
3 recaptured 3/15
we were biopsied for fat 9/14
weed chain*

George,

Thanks for the note. Glad that we did pick up some of the biopsied turtles. We did the scuba dive down the middle at 1400 hrs on Saturday. Three divers were arrayed along a 22 ft section of line (one on each end and one in the middle). They swept the bottom near the middle from the area in front of our camp to the west end of the lagoon. None of the divers saw a single turtle! I followed along on the shore to see if they scared up any animals but I saw nothing - during the dive I counted surfacing turtles (none of these were near the scuba divers) and 10 of the 14 I observed had white spots on them. Seems like there may be something to the post tagging behavior change- I don't think we caught 75% of the animals in the lagoon.

*But could
the
seeing
any*

We did not do any tv monitoring of the inlet. There were a group of fishermen down there Saturday night and we were unable to set the camera. We were also a bit too tired to get excited about it all. Next time, I hope!

The fishermen had both inlets totally blocked off and we were all wondering how animals could get it. As it turned out, turtle #366 was still outside the lagoon when they set the net. It was back in the lagoon about 30 minutes later. Somehow #366 managed to get by the net. I assume that others do also. We watched the fishermen carefully and they checked the net frequently and, as best we could tell, there were not turtles caught in the net. Still, it is a worrisome practice.

This morning we followed the three sonics out into the bay but it was still a bit rough to keep track of them safely. We packed up and left by 1030 hrs.

We also feel the weekend went well and thank you for everything. The students enjoyed meeting your friends- They were very friendly and helpful.

Have a great trip to Tokoyo- talk to you when you return.

Marc

3/12/95
Welcome back! I bet your biological clock is a bit mixed up. You really should slow down a bit (you are getting older you know)!

I got some information on Archival tags from an outfit in Australia called Zelcon Technic Pty Ltd. I will xerox the info and mail it to you tomorrow. I was wondering if you would be interested in placing some of these types of tags on the Kiholo animals. I would. I think it would give us a good idea of their activity, movement and behavior to go with the general picture that we have gotten from the sonic tags. If we were able to get together some time and think over exactly what data we wanted to obtain, they (Zelcon) might be able to accommodate some other sensors in the device.

At first I was thinking that we could attach them like we did the sonics but with a long life battery it might be smart to fiberglass them on- that is if we can download the data by simply plugging into the download port without removing the tag. If we placed a sonic tag on the animal at the same time, we would be able to track and retrieve it more easily. Your thoughts?

Here is another one for you. Some time ago, you mentioned that you had another Florida turtle to dissect. I will be bringing some students over for the marine symposium (you read one of their papers) on the weekend of April 29. Would it be possible to do the dissection/a Kaneohe trip on either the preceding Thursday/Friday or the following Monday/Tuesday? I have George Watson ready with his video for either of those but he and I prefer the Thursday/Friday if possible.

I was back down at Kiholo on Wednesday (3/8) and everything seems fine. I was able to pick up 357 and 447, even though it was rather rough. I watched for the spotted turtles and was unable to see a single one. Some anecdotal evidence that the paint wears off within a week!

Let me know when you see daylight in your schedule and we will try and schedule a trip on the Kona Aggressor off Honokahau (that is if you are interested).

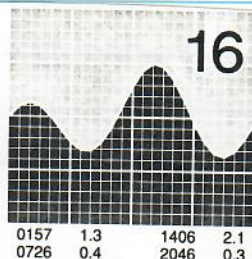

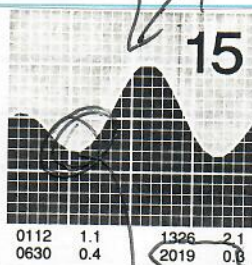

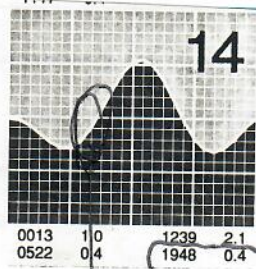

I have been getting some critical mail from CTURTLE that they served shrimp at the banquet during the symposium-- naughty, naughty....
One can't do anything without getting in trouble these days....

Have a great week...
