10/11/04 Thursday light rain but warm (too warm in room)
 Breakfast in Hotel Restaurant.
 Hotmail email accounts wouldn't open / messages. IPhone not forwarding calls.
 Checked out of hotel 11 AM - to Shin Osaka
 Departed on HIKARI "RAIL Star" Reserved
 #140⁰⁵ seat 13 B no smoking Car 4 (Quiet car)
 at 12:46 pm for FUKUOKA. Arrived
 3:32 pm - Schedule says 9 stops made but
 doesn't seem like that many.

At FUKUOKA walked to JR line and
 took train 450¥ for KASHI & FUKUMA.
 - Sunny side - little school girl lost shoe
 getting on - fell onto track. JP man jumped
 down and retrieved it after train left -
 Conductor took her name on ride -
 Met "ANERIA" bound for KASHI to see
 Aunt biology major from Indonesia JAKARTA
 had been in Hiroshi City.

At FUKUMA I took a taxi to hotel.
 Room 307.
 Dinner Japanese in hotel 2,600¥ + 2 beers
 ~ 4,000¥ raining.

11/12/04 Friday up ~ 7:30 am breakfast
 comes with room 11th floor
 overcast but no rain. Peter Bennett
 beautiful view - call Peter Bennett
 Walked to KORO MINATA Harbor -
 pictures - sunny Ferry boat from
 here goes to OHSUWA IJ and
 is 2 miles away. Walked to

9

11/12/04 main Highway ord to Yamttt Marine
Friday store "JUSD" is RESIN.

All Boats made of fiberglass. Common.
He bents lunch at take-out.
Saw live squid in market. Walked on
main road back to ^{5th} Hotel. ~~Canada~~ Canadian
to place. Walked on beach - low tide - very
compacted sand - virtually no footprints when
walking in intertidal. And only shallow
low tide plants.

Returned to Hotel - then by taxi to
meeting site "Camellia Hall" in
TSUYAZAKI TOWN - 20 US. Registration at
4:30 pm. Met Dr. Moon - guest from Korea
that I had been emailing.

Opening Ceremony 4:30 pm. Musical
"Tears of Mother" - 50m long. very good.
Singing - very creative, young children with
sheets over them to be eggs.
Presentations followed after break for
dinner.

Including Moon on Korea strandings from
newspapers for past 10 years. No money.
Korea cultural elements. Religious ceremony
with turtles (live only?).
Nest known on Cheju Island.

Thesis work TEXTS & M under Dave Owens
on temperature drops - breathing, feeding
and blood parameters.

Everyone overran time limit.
Several talks were absent of
accompanying graphics.

Over 9 PM. Proceeded to Japanese

CARD

Met Fishery Agency man in OKINAWA -
found nets - both small in 2 M water and
also large one > 50M deep.

Lengthy discussion with Kamezaki & Arita about
Genetic's training, DNA (nuclear), & CITES/Samples.
Before April 1st.

Her + Miyagata - first to Hawaii - Then ERITA to Jolla
to Bed ~ 1 PM

11/13/04 8:45am Shimada picked up Moon and I
SATURDAY to meeting Camille Hall.

Presentations in the morning 12:30 - 2:30pm
Bento lunch on the beach - field trip - a
few nestings each year here. LOVE Beach
to RA Shima, Taro story reportedly from
here. Stone out of beach. Pictures.

need
Ate lunch with Fumiko MATSUDA.
Picture of LISA (STAT office) beach in background

3:30 - 4:30 pm Poster Presentations. Sogawa &
hawkbill student gave me 3 bottles of taroles
for John Zardus. pictures.

Talked to Okinawa Fish Agency man - video
of movements of green turtles caught to
tube of coastal - sandy shallow.
Trap door for release - (like TED). "

SUNDAY MIYAGATA + YUKA

Also see p. 51

硬化剂 → Catalyst = MEK Peroxide

2.60 Clear resin = 樹脂

"Heat can't get out" Thick mass vs thin spread out

Stressed need to practice Beforehand OR

Mock strip attached to Futoshi of varnished carapace. 43 cm x 5 cm

20, Start ~ 1235 pm in inside back room. 22°C Desagitated need for dry - no salt water. Sand to rough up. Used ElAstone 1/2 plastic cup 5 drops Full cup = cc Mix 90 sec

Set up after putting on carapace soon after. Don't push down. Used retractable razor to trim flush. Sanded area again.

Took shell outside 90 cc resin 30 drops MEK but 20 would have been good. Mixed 2-3 min.

10 2" cross pieces + piece in front and back.

Hardened in 5 min.

INSTRUCTED to give 2nd layer 2-more cloth strips + Resin. Left carapace w/ Mock attached.

NAGOYA

+ ISHIKARI

23

11/18
Thursday

Departed in Aquarium vehicles with turtles ^{ATSEA} ~ 12:30pm
for ISHIKARI - Transported all
up elevator to 2 "Power Rooms"
Returned with Mr. Kurita ~ 2pm to
Tsujiuchi-Guchi (means landfill of ocean) station →
back to Kanayama, hotel. Lunch at
2nd floor internet cafe.
Returned to aquarium at 5:30pm. Kurita
drove us ^{back} to Ishikari. Room 123.

Turned on SPOT 4's ~ 7:00am but found that
many were already on. When putting into
water at aquarium there was change of
conductivity which causes switch from
standby (=Monitor) mode to deploy mode.
10 rapid blinks = deploy mode.

See p.
Dinner together on ship = Kurita, Mr. Kobayashi,
Mr. NAKAMURA, Mr. TUBOI (Press ^{man}).

(Nobida did NOT come on this trip)

11/19
Friday

Up 5am. Call Wildlife Computers and
ask to make sure that change of
conductivity that caused automatic switch
from standby to deploy mode had
not switch them to something
different than a "regular" deploy
mode. Dan said that all was
fine.

10 rapid blinks followed by
2 sec constant, then dim glow until
stop of minute signifies ON (deployed).

24

Sandai

Mihyo TAKAHASHI
"ISHIKARI"

ISHIKARI Release

H/19/04
Friday

Turtles out on deck at AM.
ST24's Reset with magnet so
that 6 hours will be present of
release. Olive had left only
ST24 (12/48) reset.

therefore
some offset

Fairly calm seas but some light mild
soft spray blowing.

23°C
seawater
34° 52.0N
140° 35.4E

All turtles flawlessly released from
630am - 644am. Rice took video
I used Digital Camedia C-600
Too low of light.

Breakfast at 730am then slept
from ~9am - NOON.

BACKNOTE: The following transmitters were "on" when
magnet passed at ~7pm 11-18-04.
Spot there were some others also on but
didn't get recorded: #2, 4, 5, 6, 7, 8, 9, 10,
13 of 11, 14, 16, 17, (20)
22 FOR SURE, several (maybe) needed to be turned on.

Need Common
35mm SLR Digital C-600 didn't taken clear pictures - too
slow for low light and quick movements.

11/19/04 ARRIVE SENDAI ~ 530pm. Took bus
Friday to local Train station - Train
to SHIN-SENDAI. SHIN KANSEN to
Bought Bento lunch dinner

#100
w/po TOKYO (East JR); Then Nozmi TO
NAGOYA. TOO HOT IN BOTH TRAINS.

- RESTRAIN TURTLE SO IT CAN'T MOVE AROUND. PUT TAPE ON SHINY SCREW HEADS OF TRANSMITTERS

* ITEMS TO VIDEO & DIGITAL STILL

- PRACTICE BEFOREHAND - use blocks of wood - onto Bowl or BASKET or curio case.
- Wash & clean turtle shell
- DRY the shell PAPER
- SAND IT TO clean & rough up the shell
- MIX ELASTOMER & apply - Antenna position
- IDEAL TO GO OFF FACT; TRIM & Resand & Remove DUST.

TRANSMITTERS - when all have stopped

Milani means to estimate natural analysis of duration of transmissions - PUPA = TRAN TYPE - Turtle size - Release MONTH
 Any into false? post note for most PS wasn't set - duty cycle
 Number of transmissions received for each turtle? Was this needed for post-hook paper? This would vary by dive/surfacing individual behavior of each turtle. would have to assume exposure to same satellite overpasses - and this is indeed the case. (see p. 26)
 J. Nichols web site "protected STATEMENT" ON EACH MAP.

ISHIKAEI

11/19/04 GAVE Captain Patrick Chong Book & maps of ISHIKAEI Releases.

(CONTINUED ON PAGE 59)

resin cleaner

【使用上の注意】

- 子供や、幼児の手の届かない所に保管してください。
- シミになる恐れがありますので、衣服等に付着しないようにしてください。
- 万一飲み込んだ場合は、直ぐに医師の診断を受けて下さい。

【使用方法】

- 適量を手に取り、少量の水を加え、汚れが浮き上がるまで、良くこすり合わせて下さい。
- 洗浄後は水で完全に洗い流し、良く乾かして下さい。

resin cleanerはサーフボードに付着した、タールや汚れ等を落とすクリーナーです。サーフボードのリベア座の手に付いた樹脂もきれいに落とすことができます。

子供に注意

All Id's put out for PNPA except 50156 and 50157 have shown up in ADS with at least a Z??? - most are going well giving good data - but we haven't received anything but Z??? for 50147 and 50149 - keeping fingers crossed that within next few transmission periods these will show up w/ good data.

Smart on / Smart off Protocol for SPOT4

1. Swipe magnet once to view the mode of the SPOT tag.
 - a. 2 blinks followed by a 3 second pause and 2 more blinks, signifies monitor mode. (STAND BY)
 - b. 10 blinks signifies deployed mode. **BLINKS ARE VERY RAPID**
 - c. Both of these patterns will be followed by a solid 2 second blink.
 - d. At this time if the SPOT4 is deployed, the tag will dimly light its LED until the top of the minute is reached. If in monitor mode, the SPOT4s LED will just turn off.
2. To change between monitor and deployed mode, swipe the magnet once.
 - a. After the appropriate number of blinks, as listed above, there will be one long solid blink (2 seconds in length).
 - b. During this long blink, swipe the magnet again to toggle between monitor and deployed mode.
 - c. You will then see the appropriate blinking patterns as listed in #2 above.

To change from stand by (all are in stand by) to deploy you must swipe magnet 2X as described above

Monitoring

While monitoring, SPOT4 wakes up every ten seconds to check its conductivity sensor. If SPOT4 finds that the conductivity readings have significantly changed from the running average of the previous eight readings, it increases its sampling rate to once per second. If the change lasts for five seconds (signified by a blink per second), SPOT4 automatically enters the Deployed state and shows the blinking patten as listed above in 2b.

Deployed

When first deployed, SPOT4 turns its LED on dimly waiting for the top of the next minute. SPOT4 is not recording data or transmitting messages during this phase.

If collecting Timelines or histograms, the SPOT4 will blink its LED every 10 seconds when it wakes up and archives data. This behavior will stop after 31 hours.

Otherwise, the LED will only blink when the SPOT4 transmits data.
