船旅で友情深める

中日海洋エクス

カーション帰港

第四十四回中日海洋エ

クスカーション(中日新聞社主催)に参加し客船「にっぽん丸」(二一、九〇三ト)に乗り込んでいた中部九県の小学六年生四百七人は三十日午後、一泊二日の船旅を終えて名古屋港へ帰港した。

子どもたちは船旅の間、手旗信号の練習、星の観察、アカウミガメの放流などを体験。三十日の下船前には、国際交流のために同乗したメキシコ人の十五、十七歳の少年少女七人と交歓会を開いた。メキシコの少年少女が民族舞踊を披露し、日本語で母国の歴史や文化などを紹介。さらに、日本の子どもたちを舞台上に上げて一緒にダンスをした。岐阜県各務原市の川島小六年、苅谷優斗君(こ)は「これから外国の人に会っても仲良くなれそう」と笑顔を見せた。子どもたちは握手を交わしたり声をかけ合ったりして、友情を確かめ合いながら下船した。

### Cultivated Friendship, Chunichi Marine Excursion

407 elementary school students in the 6<sup>th</sup> grade, gathering from 9 prefectures, joined in the 44<sup>th</sup> Chunichi Marine Excursion, and came back to the Port of Nagoya after one night voyage.

During their voyage, the children experienced flag semaphore, the observation of stars, and releasing loggerhead turtles. On July 30, just before they get off the liner, they enjoyed performance by Mexican students, who also got on the liner for international exchanges. Mexican students performed their folk dance, and introduced the history and cultures of their homeland in Japanese. Besides, they invited Japanese students to the stage, and danced together. Mr. Yuto Kariya (11 years old, Kawashima Elementary

School, Kagamihara city, Gifu prefecture) said with smile, 'when I see foreign people next time, I can befriend them soon.'

The children shook each other's hands, confirmed friendship, and got off the liner.

FISHING BOAT BACK FROM EEZ waters

A Japanese boat headed home Tuesday from waters near Okinotorishima island after completing its political gesture asserting Japan's exclusive economic zone in the area, which China disputes.

The fishing operations in the waters near the uninhabited island, about 1,700 kilometers south of Tokyo, were in response to a request by Tokyo Governor Shintaro Ishihara. The Tokyo metropolitan government administers the island.

4/18/05 Village, Bridge/highway and RUSTING ship hull in shallows.  
Monday Sighted 3 turtles surface in this area, but all  
Any individuals - not locked copulating. Motored around watching for  
45 min. PAIRS - none seen. Motored out NATURAL

embayment to the left, perhaps past 3 sand beaches -  
to the 4th. Watched here - 30 min. Saw

1-2 single turtles. Then saw copulating pair  
TOJI inb state w/ long spear, detachable point, buoy w/ flag  
(extra buoys) - cord from point to flag buoy - 2 into  
male - didn't separate copulation for 15-16 min thereafter

Didn't swim off fast, rather slowly - seaward but  
not far. Iron point went  $\frac{1}{2}$  -  $\frac{3}{4}$ " into hard  
base of surface. Small buoy served to tie  
rather than hold tie. Point of spear doesn't get  
out. TOJI came back for second flag buoy - went

out and speared female. They hooked the  
flag to boat and then to rail near over-plastic  
to hull. Second turtle escaped the harpoon.  
They didn't seem to be having any fight-struggle.

they are EXHAUSTED turtles from migrating/copulating?

Motored to port dock, electric hoisted to fork, ft →  
driven to scale where weighed measured by Mamami  
Staff. Male thereafter white foam - nostrils and  
mouth - lethargic. More sunken plastic than

expected? TOJI decides to give male to  
to Mamami for MOC breeding. Will be  
eaten afterwards? Included to harvest  
count? Male to cop tanks - fork HA

EXISTING male taken out - TOJI 5? - sold to  
KOWAI Store. buoy for live kg.  
Today's male put into tank but  
is very weak - can't lift head (continued p. 2)
