side Kiholo Bay

久

I attach below a jpeg file on the character 999 (sorry, I don't have pdf maker, let me know if you can see the jpeg one). The top one is the Chinese character for "long-lived or a long time", and it sounds the same as "9". The bottom one has the meaning of "very long-lived" or what "999" implies, you can see the double words, the first two characters also mean "long", so it's very long-lived.

The Cantonese pronunciation for "9" is "gau", the Mandarin is "jiu".

The pronunciation for the first two characters of "long" is "Cheung" for Cantonese and "Chang" for Mandarin. So it's pronounced as "Cheung Cheung Gau Gau" or "Chang Chang Jiu Jiu". This is also a blessing word for newly married couple, meaning that you wish them to have a long-lasting marriage.

[ BRIEFLY ]

**HSB 10-21-06**  
**Seismologists name**  
**quake 'Kiholo Bay' A6**

Sunday's 6.7-magnitude earthquake will be known as the "Kiholo Bay" earthquake.

University of Hawaii seismologist Cecily Wolfe said she and her colleagues at the Hawaiian Volcano Observatory agreed on that name.

It was a surprise to them when people initially attached "Puako" to the earthquake, because that was too far from the epicenter, said Jim Kauahikaua, scientist-in-charge of the observatory. "At HVO, we decided Kiholo Bay is a more appropriate geographic name," he said. "The earthquake epicenter is right outside Kiholo Bay."
