Some Objective for Puako captured tagging -

Research TO

1. Establish a second pool of tagged turtles in Kona/Kohala to compare growth rates, food sources, population size and related life habits with tagged pool at Kiholo **and being monitored at Kiholo**
2. Determine if movements of tagged turtles are occurring between Kiholo ↔ Puako ;
3. Assess Puako population for presence of Tumors
4. Contribute to marine biological data base for "fishery management area" designated at Puako and the newly established marine lab field station being started at Puako

Education TO

1. Provide a supervised field experience for marine biology sea level of HFA to be involved by research techniques as carried out by the National Marine Fisheries Service. (note advantages of Puako proximity and focus on daytime activities)
