Date: Wed, 10 Jun 1998 09:39:36 -1000 (HST)
From: Shawn Murakawa <smurakaw@honolab.nmfs.hawaii.edu>
To: "George H. Balazs" <gbalazs@honolab.nmfs.hawaii.edu>
Subject: Re: Dr. Landsberg

- 1) Collect around 30g algae (not too much salt water) in plastic bag
- 2) Pour water from bag into graduated cylinder
- 3) Add water to make 100ml
- 4) Take algae out and weigh 30g of algae
- 5) Pour 100ml water + 30g algae back into bag
- 6) Seal then shake bag 30 times
- 7) Decant 50ml of water into larger labeled plastic bottle then add 10ml of 10% buffered formalin, swirl
- 8) When ready, swirl bottle 15 times
- 9) Pipet ~~10-15ml~~ (couple ml from top of vial) water/formalin mixture into scintillation vials
- 10) Put parafilm on top of scintillation vials before sealing

Rinse measuring containers between each sample with salt water and be sure to change pipets with each sample. If you have any questions please feel free to email her at home.

Date: Tue, 16 Feb 1999 16:09:04 -0900
From: Dennis Russell <Dennis.Russell@uas.alaska.edu>
To: George Balazs <gbalazs@honolab.nmfs.hawaii.edu>
Subject: Midway algae

Dear George, I just received your two Midway samples: 10-21-98 Bag #1 Midway is Dictyota friabilis (Phaeophyta) 10-21-98 Bag #2 Midway is Struvea anastomosans (Chlorophyta). I don't think we have seen S. anastomosans in turtle samples. S. friabilis shows up in trace amounts in turtle samples all of the

Metal Tool #34 + white paint
no noticeable marks

3rd and 2nd lateral. right & left

Dear George,

First turtle for the century tagged on Midway! It was quite calm. A great experience for me because I've never seen vit tags inserted. In Darwin they only use the metal tags on that project I worked on. Check out the tail length - seems like the longest we've had in a while.

HAPPY NEW YEAR

Anja

MIDWAY

See p. 90-
FOR OBJECTIVES

3/24/99 Depart "GI" Gulfstream
Wednesday ~ 4:30pm 4:15am w. flight

TO Midway. LISA flight attendant.
Met my Auntie, Rob, Nancy, ^{TO Commander} upstairs Bedroom
Step Barkley, OSE Cynthia. She's seen
3 events of copulation. Walked 80pm to
Cargo pier - data logger on cord there for
Watched copulating pair Turtles at surface
for ~30 min between Cargo and Fuel piers. Still
there when I left. Walked to inner harbor
data logger cord caught, so could pull up.

3-25-99 up ~ 6:30am - light in sky.
Thursday 7:30am breakfast #5 at Cafeteria
w/ air craft port flight inspection. ^{FIVE: ♀ = Barkley}

8am meeting w/ Rob, Ken, Nancy +
re: strategy. Concerns: what others
will think handling turtles when there
100' limit + press to open West South Beach

9am Turtle adult on sand between piers. Short
time later an adult ♀ seal "M" hauled
it - was there together until at least

3/25/99

2:11 AM bashed up at KK Beach - 5-7 people
picked up and put in pickup bed w/oto tool
"2". (no "1" used).

Watched beach harbor all day -
strong wind - water spray over inner
harbor out jetty. no turtles seen
here. Two large turtles seen along
wave wash to beach. 23 turtles small
feeding along cargo pier seawall

Replaced on set loggers on Cargo pier
(see P. 162) 2:45 PM 3/25/99 (24565) deployed.

4 PM second turtle bashed hauled
out to beach for east end. used
carpeted box to w/oto tool "3"

Dinner at Shallenbeyer w/AAA
Wind/Rain Storm

3/26/99

FRIDAY Scoop netted at 3 major sites
yesterday - outer, seawall of inner harbor,
Cargo pier, and S.E. Seawall. 8 Total.

70M MIDWAY
MARCH 27/99 NO LARGE TURTLES
ever seen eating Mañowan? OR seen feed along sea wall
conclusion of 2/01 they go out
codium
Halophila
be

3/26/99 NO BASKERS out on any beach, FRIDAY However, hit beach 11-12 noon.

2 in wave wash - likely a male and female. All sites checked until 6:15 PM. Turtles relatively easy to catch w/ scoop net compared to October.

3/27/99 PAINTED "5" seen feeding along inner harbor outer seawall. 2 other by cargo pier. SAT.

Scoop netting again - no baskers up.

4:15 PM meeting w/ Rob, Nancy, Bruce +

3/26/99 8 PM Lecture by Ken w/ me supplement at FWS office on turtles.

3/27/99 Aloha 737 arriving 7:30 PM
Depart 8:30 PM. 2 hr. 45 min. flight.

Small cooler,
→ Left with FWS at Midway: 95cm Galiper, 12 ft
40 PITS, TRACKER II Reader, 2 motor tools, 2 #131 bits, 2 sheets (all Midway data 10/98 + 3/99) 2 biopsies/salt solution

17-1
given to me!
Photo by Cynthia of large turtle hauled out on
limestone bridge - rolls of fat by hind
flippers.

George, from my records here at the office, # N31/N32 was tagged here on 1/13/99 that is about one year ago. So, no big deal. I must be being a little bit off. The study number 34 must be year 1999.

George, I do try to write, but we are limited now on how many hours we have on the web...since the email computer is in the office now and going over 100 hours a month (13 people in office on one computer) is big bucks... I have become less wordy. We are up to motool # 37!! Hey, yesterday we captured a female turtle with the number 125 on the carapace and PIT tags 2204532E79 (LHF) and 411C694852 (RHF). The carapace was concave on the right side of the animal. We put in PIT tags to turtle N31 (LFF) /N32 (RFF) metal tags. Was I suppose to remove the metal tags?? I forgot. Also, another question: When I am putting the number on the scute of a large turtle does the number go on the second scute from the anterior of the animal or the second scute from the posterior end of the turtle? The next photos and information will go out on the flight on 29 January. Please let me know where the turtle #125 is from, thanks! peace, Nancy P.S. we have heard the turtles, but not seen them...the saw is sharp and waiting!!

75

Hey George! Nice to hear from you! The tale of basking turtle abduction. Shan found both turtles. The first, the biggest, was about 93 cm or so...big guy! It was hauled up on the rocky shore between cross point and turtle beach. The turtle was mostly out of the surf, except its tail and hind flipper. We got to use our new turtle box for the adventure! We got the box over the beast and tried to move with it up closer to shore out of the water. It worked pretty well. Since it was so large of a critter I did place both PIT tags in the hind flippers, right and left. We all got wet and it was great fun. Just about a half hour later Shan calls about a basker on the east side of bulky dump on the rocky shore in front of the old garbage scrow. A small basker, I can not remember the carapace length. We grabbed it (four of us) and hauled up onto the grass/sand for processing. Everything went well and it was small enough that I put the tags in the front and hind left flippers. Both were tumor free, full bodied (fleshy part seemed fatty and full), strong, and no sign of tags in their flippers or pits of flippers.

Estimates of re sightings....we seem to see #5, #8, #13 often. Suzanne saw #3, a basker we tagged, swimming near a seawall....I do not have the details of that one yet. The numbers look good. The paint on the shell, outside the lines of the number, is wearing off and all looks good. As far as I understand Suzanne and Cynthia have not seen any tagged/numbered turtles out on the reef. They seem to be quieter about turtle sightings these days. I don't know why? I have ideas of why, but who knows!?

>turtles and maybe even numbers ON turtles are then seeing out along the >fringing reef limestone (hauled out)? Any more copulation sightings (HEY, >no smartaleck answers back to me with that- it's a strictly scientific >question!). Spring is in the air. We did see two large! turtles copulating in the inner harbor. They were hooked up for at least 30 plus minutes. They started near the east side of the tug boat pier and floated over together to the seawall near the boat house! It was a great sunny day for the activity! I will try to be specific about the dates to visit and work with you after I talk to Rob. When would be the best time to work with youlate May, late June? Talk to you later, Nancy

Hi George,
Yes we use this reader all the time. But it would be good for you to bring another reader as we are presently using the reader everyday for seal work.

If you have any extra room please ask Thea for the following supplies:

- "whurl-packs" for scats (unsure of spelling)
- containers to store tissue plugs and placentas

I have an interesting turtle observation for you. In the past couple weeks I have seen three pairs of turtles copulating (three separate sightings). In the two years I have been here I have never seen this and I spend a lot of time on the water with the dolphin project.

I have some photos for you. One of turtles on the emergent reef. Look forward to your visit.

Aloha
Cynthia

George, Welcome home and how was the trip? Hope it all went well! We have two more basking turtles done and one scoop net turtle. The data sheets and photos will come with Bruce and Suzanne when they visit Honolulu in early May for NMFS seal training. Yes, I was able to download the jpeg pictures! pretty cool! It looks a chilly in that one photo. It is funny you told me about the hand signal in one of your emails and the next day the doctors son flipped me the thumb/small finger signal, I had to laugh! It will be great to go out with you tagging/working with the turtles the next time I visit. Maybe in June? Thanks for the information on the PIT reader manual. I will get it charged and keep the battery out of the machine between uses. I have been reading the papers you sent...I am a little behind in my reading!! The TDR would be great to get on a turtle or two. Are you planning on using them on your next tagging trip on Midway? Talk to you later, Nancy

George, Are you home!?? Five days without a note!! Whats up? We tagged two more turtles yesterday. One scoop on the southeast seawall and one basker (80.5cm) on turtle beach. The surf was very active yesterday and the turtles seem to like the seawall during the high wave action days. All went smooth and Bruce will bring you the data sheets and photos on his visit to hono this next week. Things are very busy here. Trying to get a proposal written, organize for oiled bird/oil spill training next week, and work the odds and ends of everyday life! I think I need another day to organize my life again! hope all is well! talk to you later, Nancy
