Green sea turtles

Standard

Photographer Michael Nolan captured these lovely shots of green sea turtles off the coast of both Maui in Hawaii, and the Galapagos Islands in Ecuador. Green sea turtles live in tropical and subtropical oceans around the world and migrate long distances between feeding grounds and hatching beaches.

Green sea turtle off Olowalu Reef on the west side of the island of Maui, Hawaii

Green sea turtle at a cleaning station at Olowalu Reef, Maui

Adult green sea turtle in the protected marine sanctuary at Honolua Bay on the northwest side of the island of Maui

Adult green sea turtle underwater off the west side of Isabela Island in the waters surrounding the Galapagos Island Archipeligo, Ecuador

Green sea turtle underwater off the west side of Isabela Island, Galapagos Islands

ONE THOUGHT ON "GREEN SEA TURTLES"

1.

[MaldivesDreamer](#) [6 years ago](#)

If you really like turtles, you can check out my post about turtles from the Maldives. We snorkeled up close with them daily when we visited 😊
