

10-5-84 INTERVIEW - TEL. CALL FROM  
FRIDAY M.F. YEE HEE

Concerning father's management of Heia pond when he was ~14 years old. Had 6 turtles 1932 → 1937 - cloudburst breached a 100' section of wall. Turtles bought from Chinese on Mauwaka St - hearsay that they were "good for pond." His father had no prior experience with fishponds. Pond had thick mud area with seagrass on top. rest was coral. There was big hole by one of the gates 8-9' deep. Turtles liked this place. Turtles grew from 1 1/2" to "large". Took 4 years to stock with mullet. (Didn't sound very profitable or successful). Only had 6, because turtles would "play havoc" with the nets used in Ford work. Didn't eat them, didn't sell them.

Also said, for Sand Bay Is. in Karoche Bay, he had seen turtles "sunning" themselves on it.
