Telecon-

Meeting recently held with
Jacobson, Pritchard, Ehrhart
concerning papilloma problem.
Ehrhart data continues at 40-50%
(Summer sampling). Elliot
has used up \$10K assembled
from various sources for lab
work. Still can't isolate
a virus, although thinks
its a 1) papilloma virus
or 2) petro. virus. Has
"definitely" ruled out parasites
because has found no
correlation. "28 specimens
thus far examined"
Next meeting May 12 to
discuss environmental pollutants
roll + \$20K for Elliot to keep
doing lab work. I requested report.

3/16 Failed attempt to go to
Wed. Kawaiifor lecture.
