32°C WARM TOP = 3 ppm
28°C BOTTOM (Bottom in center w/ turtle often seen) = 24 ppm

Two samples for salinity (Plastic Tubes)

Sluice gate leads to inlet separating this property and neighbors road area where lava flow stopped. No outside seawater flushing. Lava stones in both ponds have white crust - look like precipitated calcium carbonate like structures in cave.

Turtle did not struggle hard when captured. Slight sunken to plastron beyond male characteristic.

This turtle was held in another
inland pond where it was fed by
another woman. Brought to Mahaweo Pond
Makaweo moved back

2 yrs ago.
to Kapoho 7 years ago. & assorted
Fed dog food, Papaya, earthworms
7:30 PM We never saw
kitchen scraps, them

12 noon

To 5:15 pm

Snorkel Survey off Main House where
2 juveniles seen at ~ 7 AM this
morning. Makawao reports seeing
turtles here.

Canyon's 15-18' deep.

Very stinky -

26°C

Seawater

75m seen resting on
the bottom. I got fairly
close before it swam away.
