10/7/99 5 Live hatchlings from Tern collected and brought to Honolulu by Vanessa Iapi - Tern data report 1999 season Mototola other gear. 4 died, frozen ultra low, one released Sat. night 10-9-99 at Kawaikui Beach Park with DMB, Lin & TGB. No tags put on it. 10/11 Monday Ran Lu picked up 6 frozen hatchlings. 4 above from Tern, one earlier that died at SLP hatchery there, and one that came from SLP hatchery (Summer 1999).
Nice, examined by Bob Morris and given to me near death

NATIONAL RECONNAISSANCE OFFICE

Barbara,
If George is still around today, please pass this information to him. He can call the NRO and maybe even go out to Chantilly to talk to them - in any case he can contact them by phone / email. He might also contact NIMA. The web pages are interesting and I am sure he will find some interesting ideas out there. George, if you already left (I will call you when I get to Hawaii next Aug). Peter

 Subject: Mug on Stranding line

FYI - (I'm following up on this). 1-7-00, ~1:30pm: Petty Off. Spaldana of the CG in Maui call saying there were two turtles not doing well by Mala Wharf. I called back when I got back from Dr. Murray but Off. Spaldana had info already. And that the 2 turtles were still in the water, tumored (numerous tumors) and acting lethargic, but still swimming, able to submerge and breathe. I confirmed that if they were still in the water we let them be, and that if they noted them on land (ie up on the boat ramp) to give us another call. I will be calling Off. Spaldana back to get size estimates and more info.

Actually the two turtles from Campbell Industrial Park are IDed as 12-13-99A and 12-13-99B since they were reported on 12-13-99, but response was held till the following morning on 12-14-99. The other turtles are 12-14-99A Pohaku Loa Way and 12-14-99B (Punaluu Beach Park, Hawaii). Hope this helps.

Friday Sat. looko - Steve Eitel re: Small turtle reported
ashore for "4 days" by neighbors, but turtle left between
6:30pm - 9pm. Top of Waimea County Resort - overnight.

2-5-00
5:30am - TO pick up Mana, to looko
Met Stan Bond 7:30am - 10am walked shoreline
New Some turtles, stills cools in pond.

TO KIHOTO, hiked in to evaluate sites.
Saw "clearing station" Small Manini & Manoa.
Two baskets, one on top of other.
Mana has been shrimp on head of turtle at

night. South Beach is the clustered basking
place Marc - 10-12 noon, 1-3pm
of greatest numbers ashore.

gear + labor
90k
Donnell's recommendation box with camera night
there low buried in rock, antenna as it.
Hurt to buy up and, from there to
school. Need a day with good visibility.

"Bill"
HAG 047
Blue
Toyota
pick up
HUB
Drove up Waikoloa to left road then
toward Kona to locate place with antenna.
Turned into Big Island Golf Club - not much
green grass, still under construction; walked
top Noel with family graves at top.

Drove to HPA, saw school and computer
facilities. Had lunch in Waimea to go
over plans.
Drove to Kona, depart on 6:35 pm Aloha for

- ① Honolulu, Dick Brock monitoring devices.
- ② Modify State Permit
- ③ Need pictures, drawings, specifications of Bay, etc. late
- ④ Bennett's - Honokowai ow webcam.

24 MARCH 00 1:30 PM 3/22 Wednesday GAINESVILLE VIA Jacksonville

Friday using sea turtle data in water to determine pop. Abundance/Trends (catch and survey) "SEA TURTLE TRANSECT DATA POPULATION ASSESSMENT WORKSHOP"

3 Methods to "Assess" populations. Assess - to say something about turtles, easier, cheaper & more efficient to measure relative abundance (vs Absolute Abundance).

Accuracy - measures bias error. Precision measures early error.

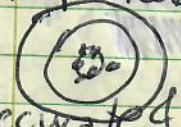

Variance = mean [(difference from mean)^2]

Standard error: SE = sqrt(Var)

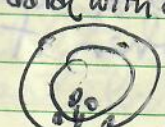

Coeff. of Variation: CV = SE/mean (measured in %)

Confidence Interval

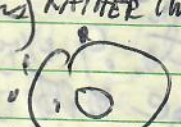

Boot strap - Resample data (possible with computers) RATHER than theoretical data.

Accurate precise STRIP transect

inaccurate but precise strip transect

inaccurate and imprecise strip transect

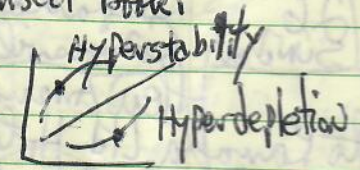

LIN transects - Tally all turtles, no matter how far away - but most are missed. "Effective STRIP width" is estimated from data. "sightings per effort"

Distance etc Scotland.

Buckland (lead author) - line transect book.

MIKE TPM "catch per effort" CPE as an Index of Abundance

Best case is linear relation, Quantitative & Qualitative uses.

In many cases, CPE can't reliably be used. MUST Standardize - sampling season, gear, factors influence capture efficiency.

Send lengths of fish
64

" need to count Caribbean
Adaptive Sampling -

" KM/HR
Mike Allen

GAINESVILLE

3-24 Friday Sampling should be a random design if CPE is used quantitatively
If standardized, nonrandom can be useful but less so.
CV $< 100\%$ is good

3PM Milani

Capture/Recapture modeling of abundance (CMT)
Focus on information on the individual

TAG year day recp sex for size moves = excel

Program MARK CSU

3-25 Saturday Put data in our computers SAS
