

Marine Turtle Strandings from January 1, 2006, to September 1, 2019, in the Joint Base Pearl Harbor Hickam Area

Description of Data Set

This data set summarizes all documented marine turtle strandings in the Joint Base Pearl Harbor Hickam Area (JBPHH) area (including Barbers Point, Ewa Beach, Iroquois Point, Pearl Harbor, Hickam AFB, and Lagoon Drive) on the island of Oahu from January 1, 2006, to September 1, 2019. For this data set, a stranding is defined as any event in which a marine turtle is found dead, injured, sick, tumored, or in an otherwise abnormal condition usually along the shoreline.

PIFSC Internal Report IR-19-013.
Issued 25 September 2019.

Date	Island	Site	Lat DD	Long DD	Species	Sex	SCL	Mass (kg)

Date	mm-dd-yyyy
Island	All listed as 'OAHU'
Site	Beach or local area names
Lat DD	Latitude in decimal degrees
Long DD	Longitude in decimal degrees
Species	All listed as 'Cm' or 'U'
Sex	The abbreviation for the gender of the turtle
SCL	Length of carapace in centimeters
Mass (kg)	Total weight of the whole turtle
Tumor Present?	The presence or absence of tumors in/on the turtle
Hook?	Whether or not a fish hook is embedded in the turtle. Unknown means that it is not verified whether or not a fishing hook is present.
Line?	Whether or not fishing line is entangling the turtle. Unknown means that it is not verified whether or not fishing line is present.
Net?	Whether or not a net is entrapping the turtle. Unknown means that it is not verified whether or not a net or trap (such as a crab or lobster) is present.
Boat Impact?	Whether or not the turtle has been hit by a boat or propeller. Unknown means that it is not verified whether or not an impact by a boat or propeller occurred.
Shark Attack?	Whether or not the turtle has been bitten or attacked by a shark. Unknown means it is not verified that the turtle was attacked by a shark.
Cause of Stranding	Final determination of the main threat to cause the turtle to strand.
Init Status	The disposition (alive or dead) of the turtle when it was first encountered on this date.
Survival Status	The final disposition (alive or dead) of the turtle on this date.
Necropsy?	Whether or not the carcass was examined and surgically dissected.
Exam by Vet?	Was the animal examined by a veterinarian?

Date the event occurred

The code of the island where the turtle was encountered

The name of the known location within the island where the turtle was encountered

GPS latitude coordinate of the event location

GPS longitude coordinate of the event location

Cm = *Chelonia mydas*; U = unknown

F = female; M = male

Straight carapace length measured in centimeters (cm) to the nearest 0.1, taken from the midpoint of the precentral/nuchal notch to longest point on shell (post central), not to the notch, using the metal caliper.

Weight measured in kilograms (kg) to the nearest 0.1 using a digital scale

Y = yes; N = no; U = unknown

Y = yes; N = no; U = unknown

Y = yes; N = no; U = unknown

Y = yes; N = no; U = unknown

Y = yes; N = no; U = unknown

Y = yes; N = no; U = unknown

Boat Impact = evidence of trauma due to propeller slashes or collision to the body caused by a boat

Fibropapillomatosis = moderate to severe case of fibropapilloma tumors

Internal Pathology - lab confirmed = confirmed by pathologist

Line Fishing = entangled fishing line made of monofilament or other material

Net - Fishing = entangled in a net used for trapping fish

Other = a known cause was determined to be the primary threat but not one of the known categories

Pending Case Report - necropsy was performed by veterinarian so awaiting the report to determine primary threat

Shark Attack = external evidence of a shark bite or teeth scratches

Trap - Fishing = evidence of ensnaring caused by a trap

Unknown - MTBAP unable to determine = MTBAP staff unable to determine a primary threat that caused the

A = alive; D = dead

A = alive; D = dead

TRUE = yes; FALSE = no

TRUE = yes; FALSE = no
