Reasons against releasing large numbers at FFS

A. Habitat less than ideal -

1. shark & ulva predation
2. slow growth ∴ long time to test graft

B. Aggregation site for transient adults

C. NOT ONE OF MY BEST SAMPLING SITES

unless: Release, than methodically shark fish.

Talked to Richard:

- Richard - Resident - I gave him my name  
and telephone no. NMFS
- "Caniakoa" ponds (freshwater)  
at Chuns - release site of  
24 turtles.
- Sand washes away during the  
winter.

one of the turtles come up on the  
sand at the water's edge.  
Family of 3 kids and one woman  
walking along the beach (picking  
limu etc.) I found the turtle and  
carried it out away.

"Molley" man's name that  
loaded boat with turtles  
and it sank.
