between populations
that continue to decline. This dichotomy in sea turtle conservation status is one of the great challenges of our time in balancing appropriate protective measures along with limited sustainable use, where such harvest and other forms of human utilization might be advantageous to both turtles and people.

GB"

In light of their rise to abundance, green turtles in the Hawai'i constitute a unique experimental model to comprehensively understand the restoration dynamics of an increasing sea turtle population. Conservation practices in Hawai'i can serve as a

The Legend of Nanri Island

LOCATION

JAN. 2017
LALAN

ACCORDING TO THE LEGEND, THERE WAS A MISS who was separated from her loved ones by the Taiwan Strait. (she) made a living by selling flowers in Nanri Island. As time goes by, the longer she lived the more she missed her family, but she didn't have enough money for traveling expenses, because nobody came by her flowers. One day, she came to the seaside where she always looked for her family. And she felt tired. So she slept on the stone which looked like a turtle shell. Magically when she woke up, she found she was in Taiwan amazedly. Finally, she ^{KNEW} ~~knows~~ it wasn't a stone, it was a turtle who was touched by the EMOTION.

Subject: RE: From George
Date: Wed, 3 Jun 2015 22:24:27 +0000

Dear George,

Thank you for helping me with this problem.

Ernest Choy showed up and told me he knows you well. He helped with another worker of his to
remove all the netting. He left about 15 minutes ago. His phone number is 233-3603 and he is the Harbor
Master
in Kaneohe at DLNR. He said you are so knowledgeable and has taught him a lot.

Fondly,
Madeline

2014 SEASON

----- Forwarded message -----

From: **skippy hau** <fishkbay5@yahoo.com>

Date: Tue, Dec 9, 2014 at 2:10 PM

Subject: Draft Summary 2014 Season

To: Rick Long <longric@gmail.com>, Courtney Brown <courtney_brown@fws.gov>, Cheryl King <mauihawkbills@gmail.com>, Donna Brown <donnabro@hawaii.edu>

Cc: George Balazs <george.balazs@noaa.gov>, "Busaba Y. Douglas" <busabayip@juno.com>, Joani Morris <napilijoani@aol.com>, "J. Layzer" <layzerj@yahoo.com>, "sunsetshi@yahoo.com" <sunsetshi@yahoo.com>

Nine honu nests -- 4 Lahaina, 1 Spreckelsville, and 4 Ho'okipa. Between 31 and 87 eggs. Averaged 56%.

Ten hatchlings released $347/617 = 56\%$.

Six hawksbill nests -- 3 Kawililipoa and 3 Kealia. Between 172 and 208 eggs. Averaged 20%.

46 hatchlings released $223/1111 = 20\%$.

Today I shipped 3 boxes of the nest remains to George Balazs @ Marine Turtle Research Honolulu for analyses.

from Kondo et al.
2017 CCB
OGASAWARA

Kondo
OGASAWARA 2017 CCB

We highlight that the number of nesting females has increased even though the legal turtle harvest has continued in smaller numbers. This indicates that sustainable harvest of sea turtles is possible under limited and regulated level. There are other examples of sustainable traditional use and trade of sea turtles. For example, sustainable, regulated harvest of hawksbill turtles, *Eretmochelys imbricata*, has been reported in Cuba, and this harvest has provided benefits to local artisans (Mrosovsky 2000; Webb 2002). Webb (2002) also provides an example of successful management programs through sustainable harvest on saltwater crocodiles, *Crocodylus porosus*, in the Northern Territory of Australia. Webb (2002) stated that conservation is linked to values of wild species, and sustainable use of wildlife can increase the value of wildlife to local communities, which ultimately promotes conservation of a species and its habitat. Also, Webb (1997) noted that scientific data collection is necessary for monitoring and assessment to achieve sustainability of a wild species. We suggest that sustainable use should be evaluated based on the results of such surveys rather than be influenced by the biases of sustainable harvest skepticism. Indeed, understanding the values of all peoples, cultures, and traditions is required for a successful conservation through sustainable use (Webb 1997). Nevertheless, the long-term monitoring of nesting females and regulation of green turtle harvest based on these demographic data has promoted sustainable use of green turtles in Ogasawara.

Regional Reporting Initiative

Schedule of activities:

2017 Aug 15: RVCs provide structure (country chapters) and authorship list for each chapter

2017 Nov 30: ALL members provide the RVCs with compiled Excel tables

2017 Dec 31. RVCs assemble the country Excel tables (labelling the files accordingly) and also

MTSG

compile the Regional Excel tables (from the info of the individual country tables) and provide everything to the Co-Chairs

2018 Jan 31. Co-chairs assemble everything and provide ALL members with all the files for comments (so that ALL members can start revising all regions/countries)

2018 Feb. Co-Chairs summarize and present the first draft at the AGM in Kobe, Japan, where it can be discussed by the attending members

2018 Apr 30. ALL members provide contributions to the first draft of the report.

2018 May 31. RVCs finalize the country and regional tables.

2018 July 31. text is added if necessary and tables are included in the word versions of country and region chapters and assembled in the regional report. Pdf version.

Need TIDECHART COPIES
ANAHAULU

5/23/17 2:15-2:40 PM H3 BRIDGE

Photos taken

Tuesday from 14 going out, 5 in.
Heleloa Pond MOST LARGE - MOST CHELONIBIA
MANY MOST MALE

HIGH TIDE

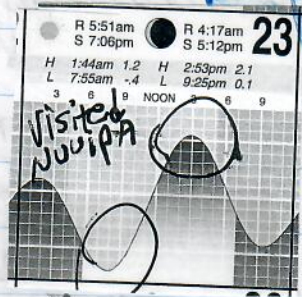

3-4 PM Walked w/ Lance to Heleloa -
Saw many heads surfacing presumed eating Gracilaria.

Need Aerial - Names of maps and connections.

AM

Midweed - need name of algae

DLNR oyster culture visit,
Collector working rear

Saw one large turtle in Great Pond area -
are they exploring into unoccupied areas in
search of more Gracilaria?

Algae (Styridia or ?) collected in large area.
Gracilaria clustered at one area of
large pond shoreline, see 9.47

Culvert under H3 - cluster of 3 + 2 others.

Need - Night viewing

Last Thursday Lance counted 10 Heleloa - lower
tide - large turtles foraging.

prntFW: The place of Hui-Ling

1 message

honu world <itsahonuworlindhawaii@hotmail.com>
To: "george.balazs@noaa.gov" <george.balazs@noaa.gov>

Fri, Jun 5

2015

Dear George,

need Google

Hui-Ling's ashes rest in "Dazhi Roman Catholic Cemetery"

It address is "No.5, Aly. 3, Ln. 145, Tongbei St., Zhongshan Dist., Taipei City 104, Taiwan"

If you want to go to the Cemetery, please let me know. It difficult to find the gravestone
Cemetery is huge.

Cindy and I miss Uncle George. We are planing to have a trip to H-
in the middle of the Aug.

Best regards

Jerry

Don't encourage monk seals in town

If you continue to publish photos of monk seals in Waikiki, the public will never grasp the notion that we ought not to have these wild animals in an urban population.

They ought to be returned to the Northwestern Hawaiian Islands. The concept is not even debated largely due to your publication.

Community Contributed

On the Wings of the Wind

By Father Pat Killilea, St. Francis Church, Kalaupapa

"On the wings of the wind He will carry us home / 'till our journey will end on heaven's shore." Perhaps these opening lines from the Bellamy Brothers expressed the feelings of the crew of the canoe Hokule'a as they left the shores of Tahiti on May 17 and sailed homeward at the end of their worldwide trip. Perhaps it was part of their feelings on this afternoon as they sailed westward from Kalaupapa to Honolulu. On Monday, June 12, under sunny skies, they had sailed into our waters and landed on our shore where so many Hansen's disease patients had landed over the years gone by. They were men and women tanned by the sun and bronzed by the winds. They were immediately welcomed by members of the National Park Service and ate a hearty meal at McVeigh Hall.

On Tuesday night, they were our special guests at our annual spring concert in Pasqual Hall, the movie house first dedicated in 1916 and rededicated after restoration in 2012 by our senator of fond memory, Daniel Inouye. This,

our second concert, was spearheaded, directed, and produced by Debbi Davis, the bookkeeper at the Care Home. Debbi also was the emcee for the evening. Several members of our Kalaupapa community displayed their talents in song, dance, and musical instruments, while Meli Watanuki provided food and refreshments. When my vocal cords began to betray me, Balladeer Rick "Doc" Schonely came to my rescue with some libation which definitely was not holy water. At the end of our presentation, Debbi called on our honored guests from the visiting canoes to sing for us and they responded with great gusto.

Thursday afternoon brought sunny skies, light breezes and calm waters. Many of us land lubbers converged on the pier and the shoreline to watch as the crews of the canoes prepared to sail. As the horn sounded, the flotilla of canoes pulled away slowly into deeper water, unfurled their sails, and with crews waving farewell from the decks, sailed toward the western horizon. On the wings of the wind, he would carry them home till their journey would end on Oahu's shore.

MAUNA LANI BAY

Hotel & Bungalows

28TH TURTLE INDEPENDENCE DAY AND JULY 4TH GUEST ACTIVITIES

HONU HISTORY AT MAUNA LANI BAY

In 1989 Mauna Lani began receiving juvenile honu, (*Hawaiian green sea turtles*) from Oahu's Sea Life Park. The honu are raised in the hotel ponds until they grow to a size and weight that is deemed appropriate for release into the wild. This release occurs every July 4th at Mauna Lani Bay - Turtle Independence Day!

MONDAY, JULY 3, 2017

12:30 pm HONU EDUCATIONAL PRESENTATION: The Sea Life Park crew will share information about the honu and Hawaii marine life. Meet at the Honu Garden

1:30 pm HONU WEIGH-IN: Get a close-up view of the honu as they are weighed and measured in preparation for their release. Meet at the Mauna Lani Lanai.

TUESDAY, JULY 4, 2017

10:00 am July 4th Food and refreshments will be available for purchase

9:30 am KEIKI HONU STATION: Learn about the honu and protecting our oceans. This fun educational opportunity is provided by volunteers and friends from HPA and the Sea Turtle Research Program and Sea Life Park. Meet beachside.

10:15 am HONU GATHERING: The young honu are gathered from the ponds in preparation for their release. Meet at the Honu Pond.

Arrive early at 9:30 am to see all the preparations!

10:30 am HONU PARADE & RELEASE Join a walking parade as the honu ride to the beach where they soon will be released. When they arrive at the beach they are welcomed with a hula and then the release begins.

HAPPY INDEPENDENCE DAY!

Please call the Concierge for more information Ext 24

Mo'omomi Preserve Access

Farrington will end in a dirt road. Continue straight on the dirt road for ~0.6 of a mile, then take right fork at a "Y". (If you reach the cattle guard along the dirt road, you have gone too far.) At fork, proceed northwest towards the coast, another 1.9mi. Park at the pavilion and walk west along the coastline to Moomomi Preserve.

Use 4- Wheel Drive Only !
