

3 MARCH 80 Brought large of 1974 turtle
 into lab - ~~tried~~ tattooing with
 zinc oxide - didn't seem to work -
 then used Freon¹² can to
 drip fluid on for 4-8 seconds -
 carapace & skin.

↓
FREON MARKING

TAG # 2495

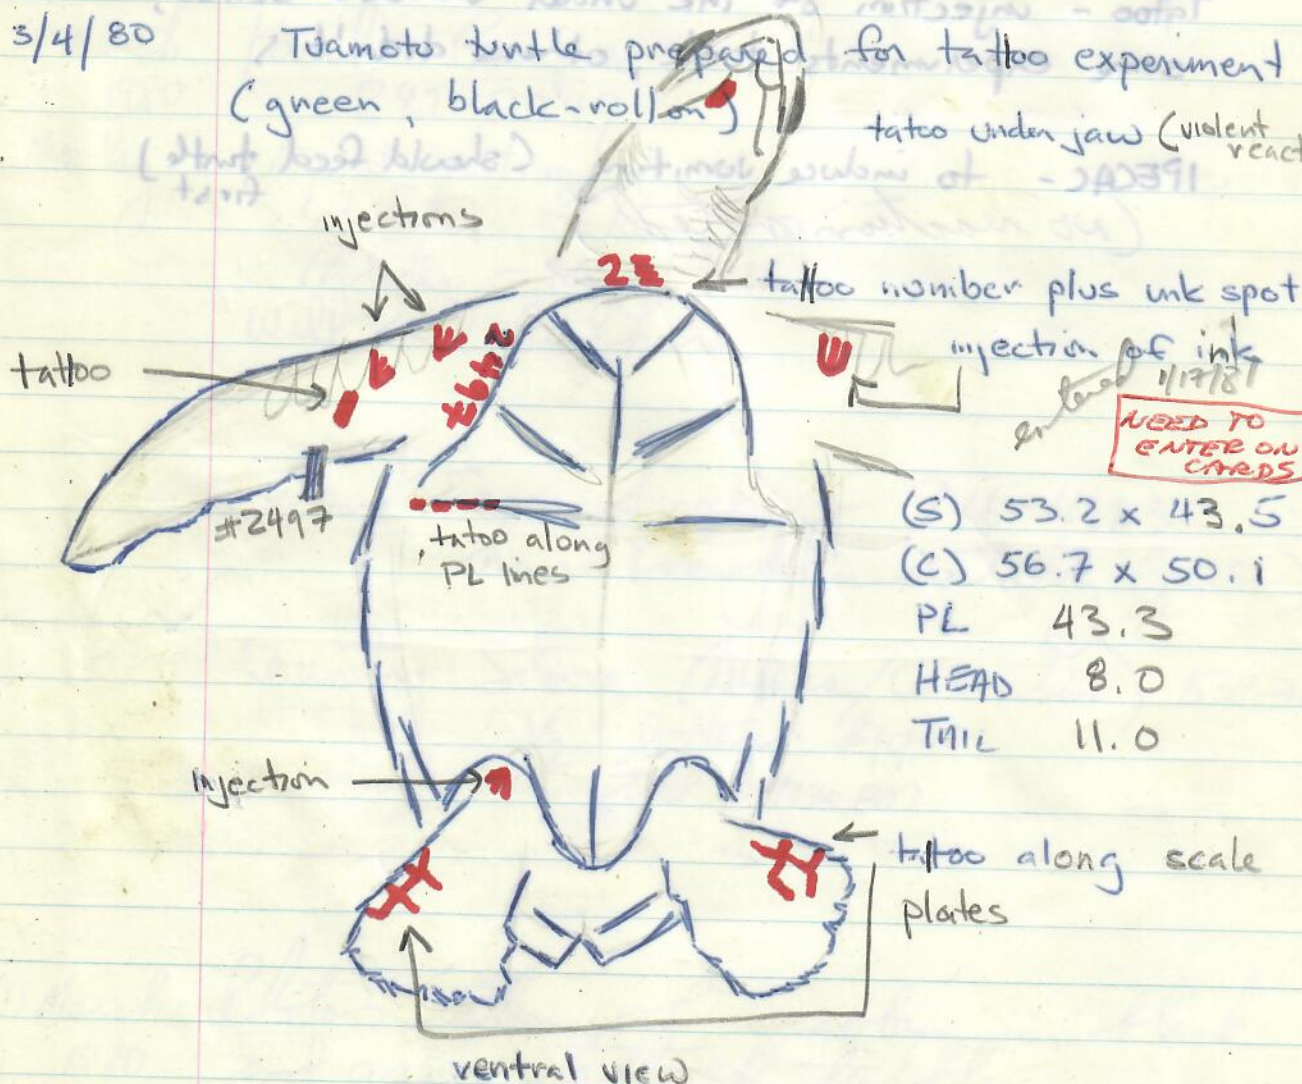

3/3/80
Monday

Tommy Kazama mentioned that he recently caught turtle off of Mokulila Beach Park with pole and line - but line parted.

3/4/80

Tuamotu turtle prepared for tattoo experiment
(green, black-roller)

tattoo under jaw (violent reaction)

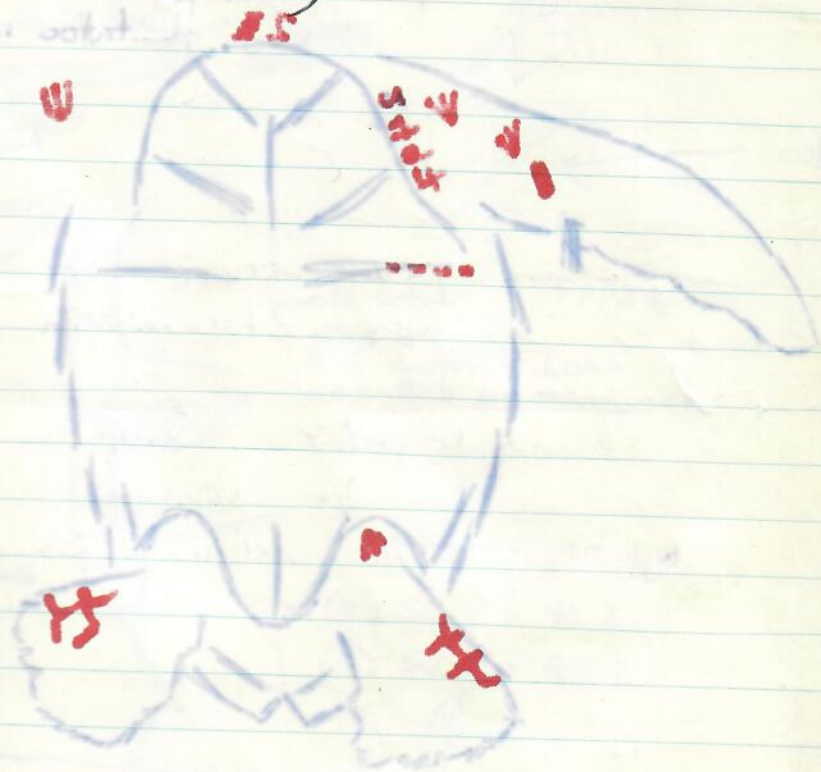

Shoulder tattoo number more readily accepted on Right shoulder skin, numbers very legible. Neck - soft skin, but ink does not set into skin as well.

LFL tag # 2081 expanded, tag was applied through last digit of the 5th Phalanges ~~knob~~ knob of scale growing out from application point.

Tattoo - injection of ink under various scales, some experiments took, others didn't

IPECAC - to induce vomiting (should feed turtle first)
(no reaction noted)

(2) 2.5 x 1.5
(3) 2.0 x 2.0
