

Resighting of Turtles Captured at Pearl and Hermes Reef

Devon Francke

Protected Species Division, Marine Turtle Biology and Assessment Program
Pacific Islands Fisheries Science Center, NOAA Fisheries

Requesting Agency/Entity:

Barry Choy

NOAA Liaison to US Pacific Command

Purpose:

In 1988 the requester published a NOAA Technical Memorandum on tagged turtles from Pearl and Hermes Reef. He is interested in seeing if any of the turtles have been seen since then.

Data Sources:

Oracle Turtle Data Processing System

Attached File:

Excel spreadsheet

NOAALiaison_BarryChoy_Pearl&HermesReef_RecapturesResightings_Dec2015.xls

Comments:

Contents of the attached Excel file are presented in the included tables. The data have not yet been published by PIFSC and are provided for use of the requester only. Others wanting access to the data should submit a separate request to the PIFSC MTBAP. If the data are used in a publication, please cite this Internal Report as the data source.

Adult green turtles newly tagged at Pearl and Hermes Reef, 1988

Tag No.	Turtle ID	Event Date	Database	Island	Location	SCL (cm)	CCL (cm)	Tumor Rank (0-3)	Weight (lbs)	Event Notes/Description

George,

No sweat, I'll be around on Fri if you're available then. My office is on the second floor on the other side of the building. My number there is 725-5268.

Aloha

Barry

Barry with regrets- not good because I have some things going on I need to do- Apologies. And also when we do meet please not in my office there is NO privacy you can hear right through the wall. And some we talk about need to be between the two of us. Looking forward to a later time- this week. Mahalo, George

George,

I'll be down at 1230 today and don't have a meeting until 1330, so there is an hour in there. If you have time I'd be able to stop by, just an opportunity and if you cannot make it I'll catch up with you another day. I'll be around for most of the day on Fri as well.

Aloha

Barry

George,

It seemed that the SCLs don't always make sense. Is the database automatically putting in the previous SCL if one wasn't taken on a recapture? Seems several have that exact to the decimal SCL in a recapture as they had when first recorded, a little fishy. I was surprised at the number of recaptures through.

Barry let's chat sometime about this. NOTE record for tag 9127 is obviously in serious error. I guess Shawn didn't have time to read them when she assembled this for you.

Happy New Year, George

Aloha Barry,

Happy New Year! Sorry for the long delay in sending this to you as there was a hold-up in the internal review process with the start of the holiday season. Here are the data that you requested. Please feel free to contact me if you have any questions.

Mahalo,
Shawn

George,

I was going through some of my papers and reviewed this one from 1988 at P&H. Counting the tag numbers here, it looks like Lisa and I newly tagged ~75 turtles. I was wondering if you had a searchable database which I could access to see if any of these turtles were recaptured, where, and how much they grew? It'd just be interesting for me to see what happened.
