Surely the epitome of 'sustainable use' of sea turtles-- the turtles sustaining the man's life when adrift in the open sea. Cases like this are not as rare as one might imagine. Aloha, George Balazs

Castaway 'drank turtle blood to survive' Independent Online, 31 January 2014. No fishing gear was on the boat and Ivan suggested he caught turtles and birds with his bare hands. There was a turtle on the boat when it landed at Ebon Atoll (Marshall Islands)...
