COSTCO
1 HOUR PHOTO

JUNE 2012

In Commemoration and Celebration of
40 seasons of systematic tagging and
counting green turtles (honu) nesting
at East Island (Hikina) French Frigate
Shoals in the Hawaiian Islands

National Wildlife Refuge.
AY540055 AY540056 AY540057
This project was initiated by George Balazs

of the Hawaii Institute of
Marine Biology at Coconut Island
(1973-1982) in Partnership with the
US Fish and Wildlife Service and, from
1983-2012, the NOAA Pacific Islands
Fisheries Science Center. Many
dedicated field biologists have been involved
in the research over the years that has
now quantitatively shown a dramatic
conservation improvement for this
formerly deleted Hawaiian population of
green turtles.
