## 2018 Green Sea Turtle Nesting Survey Kawa'aloa Bay, Moloka'i

This survey was done by a group of volunteers (Molokai Turtle Trackers) on behalf of Nature Conservancy of Hawaii Molokai, under direction of George Balazs.

The 2018 Green Sea Turtle Nesting Survey was carried out May 10th to August 5th, 2018. Volunteers checked the beach in the morning up to 4 days a week, depending on expected activity, weather, and road conditions.

On May 10th all seasonal location markers were refreshed.

There were 60 trips on shore, all basking tracks at the West end of Kawa'aloa. No nesting activity was observed.

No nesting activity was observed on West or East Kalani beaches.
