George,

What a treat to get the things you sent in the mail. I remember those Dillingham tide calendars. They were the only ones there were for decades. We always had one hanging in the house. To see your pictures in there is great. You must have had so many awesome adventures back then. You spent a lot of time in the NWHIs conducting your pioneer research, something few have been able to do.

The seabirds, turtles, and seals book I remember from when I was at Sea Life Park in the 80's. I learned my seabird species from this book you wrote since I was in charge of the seabirds and gave the seabird lectures. You look the same only younger.

I have never seen the Patrick Ching book. I read it cover to cover and it is fascinating. I will treasure all these books as reference and fun books. What great resources. Thanks so much! The autographed inscriptions make me feel so honored.

Your initial work paved the way and set a foundation for all who followed and will continue your legacy.

Ku'uilei
