Vision for Oceania

Prepared by Pacific Islanders at a 1996 SPREP meeting in Samoa

We see a future where generations of Pacific Island people will have choices about how they use and interact with sea turtles. This dream will come true if we take action now to ensure that sea turtle populations recover to become healthy, robust and stable. Sea turtles will be fulfilling their ecological role and be harvested by Pacific Islander people on a sustainable basis to meet their cultural, economic and nutritional needs.

Vision pour l'Océanie

Nous envisageons un avenir où les peuples océaniens pourront choisir la manière dont ils utilisent et interagissent avec les tortues marines. Ce rêve deviendra une réalité si nous prenons des mesures dès maintenant pour s'assurer que les populations de tortues marines récupèrent à un niveau robuste et stable. Les tortues de mer atteindront leur rôle écologique et seront récoltées par les insulaires du Pacifique sur une base durable pour répondre à leurs besoins culturels, économiques et nutritionnelles.
