TURTLEID

When present, flipper tag and/or PIT tag

Species

Cm = Green turtle, *Chelonia mydas*

Lo = Olive ridley, *Lepidochelys olivacea*

Dc = Leatherback, *Dermochelys coriacea*

Measurements

NA = Not available

Island

OAHU-NE = Northeast Oahu

OAHU-NEK = Northeast Oahu, Kaneohe Bay

OAHU-NW = Northwest Oahu

OAHU-S = South Oahu

OAHU-SW = Southwest Oahu

Tumor Score

0 = No presence of fibropapilloma tumors

1 = Mild cases of fibropapilloma tumors

2 = Moderate cases of fibropapilloma tumors

3 = Severe cases of fibropapilloma tumors

Necropsy Performed By

AA = Dr. Alonso Aguirre

LB = Dr. Linda Banish

MTRP = Marine Turtle Research Program

NN = No necropsy

RM = Dr. Robert Morris

TS = Dr. Terry Spraker

TW = Dr. Thierry Work

Euthanasia Performed By

AA = Dr. Alonso Aguirre

AZ = Dr. Alan Zane

DH = Dr. David Haas

LB = Dr. Linda Banish

MTRP = Marine Turtle Research Program

PL = Ms. Pam Leaf

RK = Dr. Roger Kehler

RM = Dr. Robert Morris

TC = Dr. Tom Chlebeczek

TW = Dr. Thierry Work

UNK = Unknownn

CATEGORIES FOR CAUSES OF STRANDINGS, 1982 - January 2008

Marine Turtle Research Program
Pacific Islands Fisheries Science Center
NOAA, National Marine Fisheries Service
2570 Dole Street
Honolulu, Hawaii 96822-2396

<i>Aneurysm</i> : Abnormal dilatation of a blood vessel caused by disease of the vessel wall.
<i>Arrow in neck</i> : Found with arrow stuck in neck.
<i>Bacteremia</i> : Evidence of bacterial infection in turtles without FP.
<i>Boat impact/Line ingestion</i> : Evidence of trauma due to a boat impact as well as ingestion of monofilament fishing line.
<i>Boat impact/Shark attack</i> : Evidence of trauma due to both a boat impact and a shark attack.
<i>Boat impact</i> : Evidence of trauma due to propeller slashes or damage to the carapace caused by a boat.
<i>Cable entanglement</i> : Found entangled in partially buried piece of cable.
<i>Covered in tar</i> : Found completely covered in tar.
<i>Crab net entanglement</i> : Entangled in a crab net.
<i>Egg yolk peritonitis</i> : Peritonitis caused by rupture of ulva from oviduct.
<i>Emaciation/Vascular fluke infection</i> : Severe emaciation in addition to vascular fluke infection.
<i>Emaciation</i> : Severe emaciation - cause undetermined.
<i>Endocarditis</i> : Inflammation of the lining of the heart.
<i>Entangled in mangrove roots</i> : Found entangled in mangrove roots.
<i>Enteritis/Vascular fluke infection</i> : Severe inflammation of the small intestinal mucosa in addition to vascular fluke infection.
<i>Enteritis</i> : Severe inflammation of the small intestinal mucosa.
<i>Excessive Buoyancy</i> : Turtle unable to submerge due to excessive buoyancy.
<i>Fibropapillomatosis (FP)</i> : Moderate to severe cases of fibropapilloma tumors.
<i>Fish Hook/Line entanglement</i> : Evidence of both a fish hook and monofilament fishing line entanglement.
<i>Fish Hook/Line ingestion</i> : Evidence of both a fish hook and ingestion of monofilament fishing line.
<i>Fish Hook/Line/Shark attack</i> : Evidence of a fish hook, monofilament fishing line, and a shark attack.
<i>Fish Hook</i> : External and/or internal evidence of a fish hook.
<i>FP/Arteritis</i> : Moderate to severe cases of FP in addition to arteritis with trematode parasites.
<i>FP/Boat impact</i> : Moderate to severe cases of FP in addition to boat impact.

<i>FP/Clothesline entanglement</i> : Moderate to severe cases of FP in addition to some evidence of entanglement in a clothesline.
<i>FP/Fish Hook/Line</i> : Moderate to severe cases of FP in addition to evidence of both a fish hook and monofilament fishing line.
<i>FP/Fish Hook</i> : Moderate to severe cases of FP in addition to a fish hook.
<i>FP/Human take</i> : Moderate to severe cases of FP in addition to some evidence of humans killing and/or taking turtles.
<i>FP/Line entanglement</i> : Moderate to severe cases of FP in addition to monofilament fishing line entanglement.
<i>FP/Line ingestion</i> : Moderate to severe cases of FP in addition to ingestion of monofilament fishing line.
<i>FP/Net entanglement</i> : Moderate to severe cases of FP in addition to net entanglement.
<i>FP/Polypropylene line entanglement</i> : Moderate to severe cases of FP in addition to evidence of entanglement in polypropylene line.
<i>FP/Rope entanglement</i> : Moderate to severe cases of FP in addition to rope entanglement.
<i>FP/Shark attack</i> : Moderate to severe cases of FP in addition to shark attack.
<i>FP/Suspect drowning</i> : Moderate to severe cases of FP in addition to some evidence of drowning.
<i>FP/Trauma/Line entanglement</i> : Moderate to severe cases of FP in addition to trauma such as damage to the carapace or a hole in the head or neck as well as monofilament fishing line entanglement.
<i>FP/Trauma</i> : Moderate to severe cases of FP in addition to trauma such as damage to the carapace or a hole in the head or neck.
<i>FP/Vascular fluke infection/Bacteremia</i> : Moderate to severe cases of FP in addition to evidence of vascular fluke infection and bacteremia.
<i>FP/Vascular fluke infection/Line ingestion</i> : Moderate to severe cases of FP in addition to evidence of vascular fluke infection and line ingestion.
<i>FP/Vascular fluke infection</i> : Moderate to severe cases of FP in addition to evidence of vascular fluke infection.
<i>Gunshot</i> : Evidence of a gunshot wound.
<i>Hepatitis</i> : Inflammation of the liver.
<i>Human take/Net</i> : Evidence of humans taking turtles using a net.
<i>Human take</i> : Evidence of humans killing and/or taking turtles.
<i>Hypothyroidism</i> : Massively enlarged thyroid (goiter) associated with a diet deficient in iodine.
<i>Kite string entanglement</i> : Found entangled in kite string.
<i>Leaves in intestines</i> : Large amount of terrestrial leaves found in intestines.
<i>Line entanglement/Shark attack</i> : Evidence of both monofilament fishing line entanglement and a shark attack.
<i>Line entanglement/Trauma</i> : Evidence of monofilament fishing line entanglement as well as trauma such as damage to the carapace or a hole in the head or neck.
<i>Line entanglement</i> : Entanglement in monofilament fishing line.
<i>Line ingestion</i> : Ingestion of monofilament fishing line.

<i>Lobster net entanglement</i> : Entangled in a lobster net.
<i>Monofilament net entanglement</i> : Entanglement in a net composed of monofilament line.
<i>Necrotizing myositis</i> : Necrosis of skeletal muscle associated with bacteria.
<i>Net entanglement/Shark attack</i> : Evidence of entanglement in a net in addition to a shark attack.
<i>Net entanglement</i> : Entanglement in net of unknown type.
<i>Net/Line entanglement</i> : Evidence of entanglement in a net and monofilament fishing line.
<i>Organ inflammation</i> : Inflammation of organs – cause undetermined.
<i>Parachute anchor entanglement</i> : Entangled in a parachute anchor attached to boat.
<i>PENDING</i> : Awaiting necropsy and final reports.
<i>Plastics in intestines</i> : Large amount of plastics found in intestines.
<i>Pneumonia</i> : Inflammation of the lungs caused by bacteria.
<i>Rope entanglement</i> : Found entangled in rope.
<i>Serositis</i> : Inflammation of outer lining of intestines.
<i>Shark attack</i> : External evidence of a shark attack.
<i>Sleeping bag entanglement</i> : Found entangled in a sleeping bag.
<i>Spear</i> : Evidence of a spear wound.
<i>Stuck in crevice</i> : Found stuck in a crevice in the reef or rocks.
<i>Suspect drowning</i> : Some evidence of drowning.
<i>Throat slashed</i> : Evidence of a clean cut to the throat.
<i>Tissue necrosis</i> : Evidence of localized death of living tissue.
<i>Trapped in a plastic crate</i> : Found drifting in a plastic crate.
<i>Trapped in pond</i> : Found trapped in pond.
<i>Trauma/Vascular fluke infection</i> : External and/or internal evidence of trauma in addition to vascular fluke infection.
<i>Trauma</i> : External and/or internal evidence of trauma - cause undetermined.
<i>Trawl net entanglement</i> : Entangled in trawl net debris.
<i>Unknown</i> : Insufficient amount of information to conclude cause of stranding.
<i>Vascular fluke infection</i> : Evidence of fluke infection in turtles without FP.

<i>Vehicle impact:</i> Injuries due to vehicle impact.
<i>FP/Vascular fluke infection/Shark attack:</i> Moderate to severe cases of FP in addition to evidence of vascular fluke infection and a shark attack.
<i>Inflammation of the eyes:</i> Inflammation of the eyes leading to opacity of corneas and blindness.
<i>Net/Rope entanglement:</i> Entanglement in rope and net of unknown type.
<i>Boat Impact/Vascular fluke infection:</i> Evidence of trauma due to boat impact in addition to vascular fluke infection.
<i>Intestinal intussusception:</i> One section of the intestines telescoped into another.
<i>Intestinal intussusception/Torsion:</i> One section of the intestines telescoped into another and twisting of the intestines.
<i>Line entanglement (non-monofilament):</i> Entanglement in non-monofilament fishing line such as kevlar.
<i>Suspect drowning/Net entanglement:</i> Some evidence of drowning related to entanglement in net.
<i>FP/Vascular fluke infection/Net entanglement:</i> Moderate to severe cases of of FP in addition to evidence of vascular fluke infection and net entanglement.
<i>Polyarthritis:</i> evidence of joint inflammation, arthritis as determined by pathologist Twork
