

London 8-3-91

Dear George,

Thank you for your letter (23-7-91) and:
"Results 1990 Workshop on Research Plan for
Marine Turtle Fibropapilloma". I already
knew about your research through several
international publications. I am very hap-
py to have now a copy of the entire paper.
Of course we are also interested in green
turtles, they do breed in Cyprus, Turkey and
probably in Syria and Egypt. Our next poster
will be of the most endangered green tur-
tle of the Mediterranean: "Green turtle breed-
ing sites" is one of our priorities! Of course
we need (if you can spare them) good pictures
of greens! I thought of something: Prof.

DENNIG is a famous Veterinary surgeon very
much involved in marine turtle parasites etc.
I know that he has worked a lot in Greece
on this subject. Here is his address in case
you would like to contact him:

Institut für Tropenmedizin und Parasi-
tologie der Universität München -
Leopoldstrasse 5 - 8000 München 40 -
Austria - Tel: 21803622.

Good luck!

Best wishes

Lily Venizelos
