Chobham, Woking,
Surrey GU24 8AR

To WH6BLQ

OC-55
21 June 1988

Dear George,

Many thanks for your letter confirming your operation from the French Frigate Shoals from 16 to 20 May. One of my friends G4DYO worked you, so I knew that you had been active from there!

I enclose a copy of the IOTA Directory. You will see there are quite a few other sub-groups in the area which need activating. If there are any opportunities to visit the French Frigate Shoals again, or any of the others listed, I should be grateful if you could let me know the dates of your operation in advance, so that we can be on the lookout for you. Many, many island chasers will be looking for you from Europe.

73
Roger.

IOTA MANAGER
Roger Balister G3KMA

IMPORTANT: HONOUR ROLL PROCEDURE

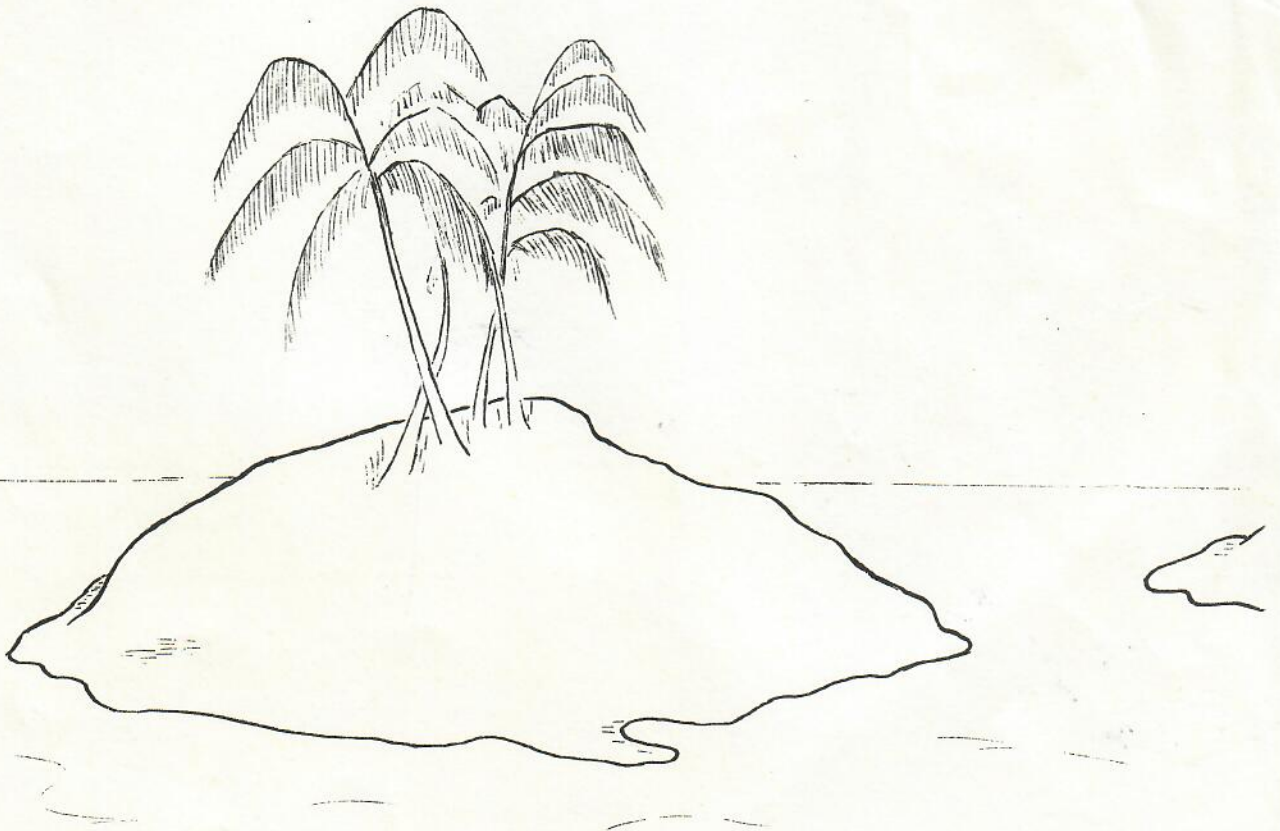

The Honour Roll appears in the RSGB's DX News Sheet twice a year, in early January and July. The deadlines for receipt of updates are 30 November and 31 May respectively. Updates received late will be left till the next listing. On each occasion please submit:

- a) additional QSLs (not photostat copies) and checklist.
- b) 50p in UK stamps or 2 IRCs or US \$1 as an update charge.
- c) sufficient postage for the return of cards. Current rates:
to Europe - 2 IRCs/US \$1 for 100gr, 3 IRCs for 200gr,
4 IRCs/US \$2 for 300gr, 5 IRCs for 400gr, 6 IRCs/US \$3 for 500gr.
elsewhere - 2 IRCs/US \$1 for 30gr, 3 IRCs for 50gr, 4 IRCs/US \$2
for 70gr, 6 IRCs/US \$3 for 100gr, etc. All airmail.
- d) an extra 4 IRCs or US \$2 if you wish your QSLs to be returned by registered mail.

A printout of the amended Record Sheet is sent to each member on updating. **Please do not submit more than one update during any 6 month period.**

islands on the air

The ISLANDS ON THE AIR Award Programme caters for DXers who are interested in contacting the world's islands and island groups. It was created by Geoff Watts, a leading British SWL, in the mid-1960s and has since 1985 been run by the RSGB.

The IOTA Programme consists of 15 separate awards, as listed below:

| | | | | | |
|-----------------------|-------------|---------------------|---------|--------------------|---------|
| IOTA CENTURY CLUB 100 | IOTA-CC-100 | IOTA ARCTIC ISLANDS | IOTA-AI | IOTA ASIA | IOTA-AS |
| IOTA CENTURY CLUB 200 | IOTA-CC-200 | IOTA BRITISH ISLES | IOTA-BI | IOTA EUROPE | IOTA-EU |
| IOTA CENTURY CLUB 300 | IOTA-CC-300 | IOTA WEST INDIES | IOTA-WI | IOTA NORTH AMERICA | IOTA-NA |
| IOTA CENTURY CLUB 400 | IOTA-CC-400 | IOTA AFRICA | IOTA-AF | IOTA OCEANIA | IOTA-OC |
| IOTA WORLD DIPLOMA | IOTA-WW | IOTA ANTARCTICA | IOTA-AN | IOTA SOUTH AMERICA | IOTA-SA |

Each Award is issued on presentation of satisfactory evidence of contact between the applicant and the requisite number of licensed amateur stations operating from islands listed in the Directory.

A feature of the IOTA Programme is the appearance of a 6 monthly HONOUR ROLL in the RSGB's weekly DX NEWS SHEET which encourages updating of claims. Details of this news sheet are available from RSGB Headquarters.

A. THE DIRECTORY OF ISLANDS

The Directory is divided into separate sections covering Europe, Africa, Antarctica, Asia, North America, Oceania and South America. Most boundaries are as indicated on the Radio Amateurs' Prefix Map of the World and in the Radio Amateurs' World Atlas, both published by Radio Amateur Callbook, Inc.. The boundary of Antarctica follows the Antarctic Convergence line as shown in the World Atlas of the National Geographic Society (NGS). This Atlas is generally used as the reference for IOTA. The Directory also contains a separate listing of the islands and groups that count for the Arctic Islands, British Isles and West Indies Awards. The current definition of the Arctic Regions is that area of the Northern Hemisphere which lies north of the tree-line, not the Arctic Circle.

The administrators of the IOTA Programme have attempted to include most of the islands of the world listed in the NGS Atlas, but they have found it necessary to group them geographically so as to limit the size of the Directory and to prevent the IOTA "total" becoming a ridiculous figure. The current list covers:

- a. all the recognised main island groups and the majority of recognised smaller groups,
- b. where there is no recognised group, the majority of larger islands, the majority of remote islands and many of the smaller islands, scattered along continental coasts, and
- c. all present DXCC islands, whether in a group or not.

Where no official group name has been found, it has on occasion made sense to create an unofficial grouping for small islands which are reasonably close to a larger island and do not justify a separate listing by reason of location, size or likely amateur radio activity. Such unofficial groups are marked in the Directory with an asterisk *.

Although there may not have been any past activity from some of these islands/ groups, they have been included in the IOTA listing so that the Directory may also provide a guide to enterprising DXpeditioners worldwide. Each island/ group with past or current activity has been given an IOTA Reference No., and this will be retained for Award and Record purposes. Additions and amendments to the list will appear in DX NEWS SHEET. See Section E below for rules governing additions.

B. QSL REQUIREMENTS

- IOTA-CC-100 = Any 100 activated islands/ groups appearing in the Directory, including at least one from each of the seven continents.
- IOTA-CC-200/300/400 = Any 200/300/400 activated islands/ groups.
- Each Continental Award = 75% of the activated islands/ groups in that continent OR 75 islands whichever is the less.
- IOTA-AI, IOTA-BI, IOTA-WI = 75% of the activated islands/ groups in those areas.
- IOTA-WW = 50% of the activated islands/ groups in each of the seven continents.

NOTES

- a. "Activated islands/ groups" = those with a Reference No. in the current Directory at the date of application.
- b. Percentage (%):- if this works out to a fractional No., round the fraction down to the nearest whole No..
- c. Submit just ONE QSL for each IOTA Reference No.. QSLs from different islands with the same Reference No. do not count separately. For example, do NOT submit cards from both Grenada and St.Lucia.
- d. The following QSLs are not accepted for IOTA Awards:
BV2AA, F08N, HH0N, K11NP/KC4, KF10/CE0X, PY0XA, VK2ADY/VK0, VQ9AA/C, VU2WNV, JA6SBO, I89WNV.

QSL CARDS

The callsign and name of the island/ group (or other identification) should be PRINTED on the QSL card. Cards with a hand-written/ type-written/ rubber-stamped callsign/ name may however be accepted if they are:

- a. submitted for credit within 3 years of the date of the contact; and
- b. supported by mention of the activity in DX NEWS SHEET at the time (give the No. of the DXNS issue); and
- c. supported by the receipt by the IOTA Manager of similar QSLs from other applicants.

Such QSLs should be accompanied by a photostat copy for retention by the IOTA Manager. A letter from the "island" operator detailing the dates of the operation and addressed either to the applicant or to the IOTA Manager may provide a satisfactory alternative solution.

SPECIAL ARRANGEMENTS FOR AN INITIAL CLAIM FOR IOTA-CC-100

- a. There is no limit to the number of QSL cards which may be sent with an initial claim for IOTA-CC-100. If applicants prefer, they may submit photostat copies of QSL cards for the first 120 islands in their claim; BOTH sides of the QSL must be shown. Where however alternative QTHs appear on the card, eg FR7ZU/E /G /T, or where a hand-written/ type-written/ rubber-stamped QSL is concerned, a photostat will not be accepted and the actual card must be sent.
- b. Hand-written etc QSLs for contacts more than 3 years old (see previous paragraph) may be submitted in an INITIAL CLAIM but up to a maximum of 5 cards only. Applicants should understand that the IOTA Manager may have difficulty in accepting old "non-printed" cards.

QSL CHECK-LIST A check-list **MUST** accompany each batch of QSLs, and should list (a) callsign (b) IOTA Reference No. and (c) island/ group name. Please arrange check-list and QSLs **IN ORDER OF IOTA REFERENCE NO.**. A record of QSLs accepted is maintained on computer by the IOTA Manager. It is therefore only necessary to submit the extra cards and check-list when applying for other IOTA Awards or HONOUR ROLL credits. A Record Sheet issued with the initial Award enables you to keep a record of QSLs credited.

C. IOTA-CC HONOUR ROLL

An IOTA HONOUR ROLL appears in DX NEWS SHEET every 6 months for the updating of scores above 100 islands. Submit additional QSLs (NOT PHOTOSTAT COPIES) AND CHECK-LIST in May and/or November for the Honour Roll appearing in early July and January. Enclose 2 IRCs with sufficient additional postage/ IRCs for the return of your cards. Scores below 200 need updating at least once a year to remain on the HONOUR ROLL; scores above 200 at least once every 2 years.

D. GENERAL RULES GOVERNING CLAIMS FOR IOTA AWARDS

1. Claimants from the UK, Channel Is and the Isle of Man must be members of the RSGB and, as proof of membership, should provide a recent address label from Radio Communication. Applicants from elsewhere need not be members of the RSGB but, where they are, should enclose the same evidence.
2. Claimants may be either licensed radio amateurs or short wave listeners. All certificates are available on a "heard" basis to listeners.
3. Each claim from a non-member of the RSGB must be accompanied by a fee of £3 or 12 IRCs or \$6 US per certificate. The fee for members is £1.50 or 6 IRCs or \$3 US. All applicants submitting cards for checking must include sufficient payment to cover their return. Cards will only be returned by air, recorded delivery (UK only) or registered mail (overseas) if adequate postage is sent with the claim (for registered mail, add 4 IRCs or \$2 US).
4. All contacts must be made by the holder of the callsign and have taken place since 1 December 1964.
5. All contacts must be made on the 1.8, 3.5, 7, 14, 21 or 28 MHz bands. At the present time credit will not be given for contacts made on the 10, 18 or 24 MHz bands.
6. Contacts may be made from any location in the same DXCC country.
7. Contacts with maritime mobile stations near islands (including at anchor in harbour) will not count for credit. But contacts with land mobile stations on islands will be accepted, provided the exact location of each station at the time of contact is clearly stated on the evidence submitted (but see QSL requirements).
8. Credit will be given for contacts made entirely on a single mode of transmission or on a combination of modes. Certificate endorsements for single mode transmission and/or single band may be made on the submission of cards clearly confirming the mode or frequency of transmission, but the request must be made at the time of the submission. Credit will not be given for cross-mode or cross-band contacts.
9. Any altered/ forged QSLs submitted for credit may result in disqualification of the applicant from all RSGB awards.
10. The decision of the IOTA Manager is final.

E. RULES GOVERNING ADDITIONS TO THE DIRECTORY LIST

A request for a new Reference No. may come from a resident amateur, an intending DXpeditioner or an island-chaser, either before or after an operation. Such requests will be dealt with as follows:

1. An operation from a listed but previously un-numbered island/ group.
A Reference No. will usually be given PROVISIONALLY pending presentation of confirmation that the operation has in fact taken place. The IOTA Manager will then need to satisfy himself that this first time activity from the island has been sufficiently significant as to justify the addition of the island to the list of numbered islands on which the threshold figure for awards is set. A QSL card giving the island QTH or a letter from the operator detailing the scale of the operation will normally fulfil this requirement.
2. An operation from an unlisted island/ group.
In view of the high level of interest in IOTA which has developed in Europe, the Directory Europe list has been expanded to cover all islands which can justify inclusion. NO FURTHER REQUESTS FOR EUROPE WILL BE ACCEPTED. Requests for the addition of new islands outside Europe however will still be considered. The following rules will apply:
Rule 1 "Inland" islands located in rivers, lakes, lagoons, harbours, deltas, estuaries - or largely enclosed bays or seas, defined as where the entrance is less than 5 miles wide - will not count for IOTA.
Rule 2 In the groups already listed, only those islands which form a recognised subgroup will be considered for separate IOTA status, with the possible exception of an island remote, defined as at least 100 miles away, from the main group.
Rule 3 In the case of an already listed main island, adjacent small islands will not count separately unless they form a recognised group.
Rule 4 Islands not already listed will normally only be considered for inclusion in the Directory if they are:
a. a recognised group or subgroup, or
b. an island remote (at least 100 miles away) from a main group, or
c. a larger or remote island not in any group.
Rule 5 Islands, groups or subgroups must be both shown and named in the National Geographic Society World Atlas.

Although there exists, in this way, provision for additions to the Directory, potential DXpeditioners should be aware that, with some 600 islands/ groups already listed of which some 400 have been activated, scope for new ones is limited mainly to the less populated areas of the world or to countries which have not hitherto shown much IOTA awareness or have been "difficult" radio-wise. Despite appearances to the contrary there is little scope for additions on the East and South Coasts of North America, where the nature of the coastline provides a continuous string of close, off-shore islands, which in many cases have seen extensive development with the construction of roads, bridges and causeways beyond the point where they can be considered islands in any reasonable sense. Islands which form part of the curve of a coast cause particular difficulty. For this and other reasons requests for additions to the list are increasingly involving marginal decisions. It would assist the IOTA Manager if those wishing to keep the credibility of the IOTA programme would concentrate more on those areas where the justification for inclusion is clear. Close off-shore islands do not come into this category.

All Award applications and QSLs (for photostat copies for initial IOTA-CC-100 claims) and any letters about the Directory (with 2 IRCs if reply required) should be addressed to the IOTA Manager:
