

Dear Mr. G. Balazs.

Sept. 21, 1982

Waimanalo Hawaii

P.O. Box 286

96796

I am very sorry to delay to write your answers and questions about turtles. After 5 weeks from Alaska to Mexico shore lines and fishings areas a aquaculture business. I find myself very guilty of not writing to let you know our fishing conservation laws which is the poorest in the nation. I wrote many letters to our local papers and ~~our~~ while our fishing and game division did not pay attention to my pleas to make a better conservation laws. I tried to call you on the phone while I was in Honolulu during the labor day weekend but I think I made a mistake on your name which is so close to the other party. Fail. how foolish it seems to be not knowing the right name.

Well I want to make it clear to you that I may not live long to let the public know about this turtle migration and habits and others things that I found out by

fishing problems about conservation.

I wish I can meet you and some of your friends about this turtle problems in Hawaii.

What I am going to give you and your friends I cannot put in records because it is shame to see what happened in Hawaii fishing industry but I can tell you and it is worth it to know better than what I am writing.

Now in the near future a new fishing is going to be launch in Honolulu and I will be invited to that occasion. I surely want to meet you in person and give you what this turtle business.

I hope you will not refuse my wish of not meeting you and your friends that I am about to release to you.

You are a True Friend  
of Conservation of Fisheries

Hiroshi Masahide

## Note

I have a heavy feeling that our commercial fishermen will be facing many problems in the near future. I am studying the book which I bought an Inventory of Life on Our Water Planet by Jacques Yves Cousteau and the staff of the Cousteau Society Advisory Members.

For prosperity through the wiser management of our global resources. This book was written in the belief that the common people of the world all of us can make wise decisions when given the right information. A Bill of Rights for the Future Generation.

This report is going to lay the blame over commercial fishing as we all know that civilization approaches wild life will disappear.

Please help this industry and look or find a fisherman who wants to hear me say about this industry.

It is urgent to start now not the last moment.

Thank you very much

fishing problems about conservation.
