Subject: Re: Midway update

The bell was sold in LA back in 1980 for \$1,000 to a housing developer to hang in the entrance which was of a spanish design, a big gated community. I sold it when I needed money bad for the family, and where do you store a 1200 pound table weight?

I also sold the light in Virginia for \$500 at about the same time to a nautical collector, and then a few years ago I found out the lens alone was worth over \$5,000 now. There is also a light identical to the one I found in use in Scotland near where I lived for 3 years. I used to see it every time I took the ferry to Glasgow.

I mailed the fishing info about Midway to you today.

Curt
