Dear George:

Many thanks for your note and comment about the Ka Leo article.

I've had many very nice letters from friends and associates over the past twenty years who have seen the article.

I was not aware that you were doing the turtle tattooing, and was very interested to read your July '78 item.

George, do you have any photographs of either the tattooing or the tattoo in the turtles?

If you do, I would greatly appreciate receiving your slides or prints. I will make a copy and return the originals promptly to you.

I assume the tattoo did not remain because of the thickness of the turtle's skin.

If you are still considering additional turtle tattooing, please let me know. I know Mike Malone very well.

Once again, mahalo for thinking tattoos, and your information.

Wishing you the best in 1990. Aloha!

Norm
