Date Tagged: December 3, 1989

Location Caught: \_\_\_\_\_

Method of Capture: \_\_\_\_\_

<u>Number</u>	<u>Curved Length (cm)</u>	<u>Curved Width (cm)</u>	<u>Tag Number On Left Front Flipper</u>	<u>Tag Number On Right Front Flipper</u>
<u>1</u>	<u>98.0</u>	<u>88.5</u>	<u>n/a</u>	<u>n/a</u>

This turtle was found dead on a remote stretch of beach at Ualapue, Molokai. The right front flipper was missing and its left front flipper displayed indications that it was bitten by a shark. In addition, numerous tumors was noticed on the soft parts of its body. The carcass was pulled ashore and buried in the bushes. Incident reported to NMFS.

\*\*\*\*\* TURTLES TAGGED ON MOLOKAI \*\*\*\*\*

Date ~~Tagged~~: June 10, 1989

Location Caught: Initially at Kawela, Molokai on June 29, 1985

Method of Capture: \_\_\_\_\_

<u>Number</u>	<u>Curved Length (cm)</u>	<u>Curved Width (cm)</u>	<u>Tag Number On Left Front Flipper</u>	<u>Tag Number On Right Front Flipper</u>
<u>654-1</u>	<u>87.0(81.0)</u>	<u>80.0(61.5)</u>	<u>missing</u>	<u>8625</u>

Straight measurements in parenthesis.

This animal was reported dead and washed up on shore at Kamiloloa, Molokai by DOCARE/DLNR personnel. The front left flipper was missing and appeared to be the result of a shark attack as the tear was very ragged. Tumors were present on the arm pits, groin areas, head and neck region of the turtle. The tag on the left flipper was retrieved but the right tag was missing along with the right flipper. The turtle was disposed of by the Maui County Public Works at ~~a~~ <sup>the</sup> municipal land fill.

The original measurements taken on June 29, 1985 are as follows:

74.0(68.0)      67.5(54.5)      mark #284 at KWG

Animal was floundering in 3-4 feet water apparently in distress. Tourists swimming in the area were able to approach and touch the turtle. After they decided that it was not able to fend for itself, they help beached the animal and contacted the Molokai Police Department. After measuring and tagging the turtle, it was led back to the water and allowed to swim away. 354 turtles tagged to date on Molokai with 37 recoveries.

Oct. 30, 1985

Dear George,

I had a hunch 17.5 cm over three years was fishy...especially since another one recaptured the same day over the same period of time was measured out to only 8.0 cm. I was too much in a rush and unfortunately too lazy to double check the numbers. I'm glad you caught it. PK's copy was not sent ~~get~~ so I made the necessary corrections. No...it was not a test but just another mistake on my part. I wouldn't do anything like that because I respect you and your work too much to make a game out of it! You can be assured that I would never pull a backhanded stunt like that on you (didn't we have this discussion before?). Any mistakes I make will be honest mistakes...and if I have a problem with something I'll be sure you'll be the first to hear about it and you won't be getting it from someone else. That's the way it's supposed to be. George, I'm going to say it again...if you can't trust me you won't be able to trust anyone else. Enough said. Actually, the above mistake is embarrassing enough for me and I could have just said yah, it was a test. But that's not the truth. I just plain screwed up!

Looking over your recovery papers, I must admit it stirred up a feeling I thought I had conveniently buried inside. When you first asked if I'd consider approaching Henry about being on the recovery team, I wasn't too eager because I was just burned out doing things like that in the Marshalls. I deliberately told Henry I wanted to be placed on Molokai to avoid meetings, trips, conventions, etc. and just wanted to be left alone for a while. After fisheries treaty negotiations in Tokyo, boundary treaties with Nauru, Solomons, UNOPES in Apia, Fisheries exchange programs in Taiwan, etc., etc., I was just burned out and wanted to relax a little. Well, I suspect I've relaxed enough and got a little excited reading about your recovery activities and wondered if it would be fun again to get more involved...I still haven't come to terms with that yet. In any case, it looks like PK will be representing DAR but maybe if you feel inclined, you might put in a good word for me when appropriate. I don't suppose it would be too bad to be PK's alternative if he couldn't make it. I suspect I could really be involved personally in a turtle recovery project as I am very interested in sea turtles. Anyway...food for thought.

I haven't been to Halawa lately nor have I heard of any hawksbill juveniles but I'll definitely keep an eye and ear out for them. In regards to the tumor slides, I'll be sure you get copies. Also, I got the tags okay.

Oct. 24, 1985

George,

I've got a few minutes so I thought I'd drop you a line and enclosed this month's tagging data a little earlier.

Ed and Diane are fishing again on a regular basis. DOCARE checked them out in the water last month and declared them legitimate. Also inspected was Hocojo who was also declared kowher. Leroy is supposed to dash off a note to that effect to some legislators who help push for the latest amendments to the bullpen regulations.

I went out with them a couple of times this month and tagged a total of 29 new taggings with 5 recoveries so far. One of the turtles (#3 on 10/16) was very heavily infested with tumors all over its body. On the inside of the right front flipper the growth was so large that when I first saw it in the water I thought it was its intestines hanging outside! I don't know how much longer it can possibly live. Only one tag was applied to it as no one wanted to touch the other flipper. I was reluctant to release the turtle thinking (or not knowing) if other healthy turtles would be contaminated) maybe we should destroy it. Is there some prescribed way to handle this type of situation? It didn't look like it would last much longer anyway. I took pictures of the growths and will forward you some after they are developed.

I recently met with Kapuiki from Lanai (the one who did the honu chant and hula at the Merry Monsoon Festival. Very interesting encounter! She related stories about catching turtles at Hiihua Beach and bring them back on mules. She also told me about a local fisherman who was surfcasting at Polihua and spotted a large turtle on the beach. When he tried to turn it on its back, the animal was too large for him to handle and it escaped. This apparently happened about 3-4 years ago. She and her husband seemed to know their stuff and probably would be an excellent source should you need one on Lanai. His name is Solomon Kapuiki.

I wrote away for several copies of NMFS recent publication concerning the review of subsistence use of sea turtles in the Pacific area and sent one copy to Bob Carpenter in Majuro. There are definitely some violations of the conditions as outlined in the document by Marshallese who take turtles for subsistence. I don't know what Bob can do about it but I felt obligated to at least point the discrepancies out to him.

I'm down to 13 tags and you might want to sent more over as Mederios indicated he will be fishing full time now. Mortgage payments due I guess.

only one tag on FL flipper!

Remarks: \*Turtle #6 was originally tagged 3 years 1 month ago in the same area. It has increased it's curved length by 7.5 cm. 310 turtles tagged to date with 26 recoveries.

August 31, 1985

George,

Enclosed is last month's tagging data. Only 7 for the month of August. 2 with Hocafo and 5 with Medeiros.

Here's the address as requested:

Fred Bicoy  
Star Route 167  
Kaunakakai, Molokai, HI. 96748

(Did you catch Fred's brother, Bernaldo, on TV re election contribution discrepancies?)

Nathaniel Burrows  
P.O. Box 396  
Kaunakakai, Molokai, HI. 96748

I've also enclosed a copy of an article from the Marshall Islands Journal which mentioned the abundance of turtles at Bikini Atoll. George, it would be very easy to get on their next planned trip to Bikini later this year. Ralph Waltz and I are very close friends and I'm sure he would make the arrangements to accommodate us. Want to go?

Also enclosed is a copy of the Molokai News with something about turtles.

For your info, I'm already on the SPC mailing list but thanks for the article re mangroves. Also, I pick up the Advertiser almost every morning but if you run across articles in the Star Bulletin you think I'd be interested in, I'd appreciate getting them. Thanks.

All for now.
