

29 May 75

Geo. H. Balazs

Univ. of Hawaii

Coconut Island, PO Box 1346

Kaneohe, HI, 96744

Dear Mr. Balazs,

In case it may be of interest to you, the following information is provided:

On 28 May 75 a dead sea turtle was found on the north-west shore (windward side) of Canton Island

Apparently male (pictures enclosed)

Length of shell (measured along the curve) 33 inches.

27,000 P.S.

Width of shell (measured along the curve) 29 inches.

Body was starting to deteriorate but looked in reasonably good condition (no flippers missing, etc) There appeared to be slight damage to the shell around the right "shoulder".

Sincerely

Philip J. Stack

Lt. Col. Philip J. Stack
