AGEDASHI-tofu

George-san,

I'm sorry I couldn't see any emails. Yesterday we had a party from noon until late at night with a family of close friends of teachers of Kochi Univ.

Yes Agedashi-tofu delicious and healthy. As you know, Bekko sauce comes from the color of tortoiseshell, the scales of hawksbill turtles. Also, I know this reporter Mrs. Yu Hayami, a Japanese idol born in Hawaii. Very nostalgic.

Regards, Tomomi

件名: NHK TV Hawaii Cooking Program

Every Saturday Linda and I watch a Japan cooking program. Today the feature was.... Bekko sauce on tofu! It looked very tasty.

## STSmembers入会のご案内

STSmembers は <Sea Turtle Support>の略で、ウミガメと共に生きていける自然環境について考え、研究・保全活動に協力する人々の集まりです。私たちは毎年500頭前後のウミガメを、漁師さんや現地のボランティアの人々と協力して調査しています。その活動を支援していただけるSTSmembersを募集しています。

活動内容の詳細については、当会ホームページをどうぞご覧ください。(http://www.umigame.org/)

TORTISE SCUB BRUSH

Alberto

Using names for satellite tagged turtles from special people involved over the years with loggerhead conservation in Baja California is something very important and we believe that those selected will be very pleased!

We want to propose:

**Antonio and Bety** (on behalf of Antonio and Bety Reséndiz):

Since the 1980s, Antonio and Bety Reséndiz have worked in Bahía de los Ángeles promoting research and conservation of sea turtles. In their center they cared for green, hawksbill, leatherback turtles and also several loggerhead or yellow turtles. One of these tortoises, which had been in the couple's care for several years, was named Adelita and released using a satellite transmitter. Adelita made history by being the first loggerhead turtle whose transoceanic migration was recorded and followed by thousands of students and onlookers online. Adelita reached the shores of Japan thus proving the enormous connection between the two countries and therefore underlining the need for international strategies for the effective protection of this species.

**Victor and Marisel** (on behalf of Víctor and Marisel De la Toba):

Víctor and Marisel De la Toba joined Grupo Tortuguero de las Californias in 2003, in charge of monitoring strandings on San Lázaro beach, Magdalena Island, where most of the stranded turtles are yellow or loggerhead turtles. For two decades Don Víctor and Doña Marisel have documented the mortality events of various species of sea turtles, mammals and seabirds, a job that is often thankless and difficult that they have always carried out with passion and commitment. The data collected by Víctor and Marisel, with the support of several researchers, students, government officials, has highlighted the importance of designing participatory strategies to reduce bycatch in both artisanal and industrial fisheries.

**Chuy** (on behalf of Don Chuy Lucero)

Jesús Salvador Lucero Romero, known globally as Don Chuy, is a fisherman from the community of Puerto A. López Mateos, who 20 years ago began to dedicate himself to sea turtle conservation. Throughout two decades, Don Chuy has been the benchmark for training students and new community groups dedicated to the care of sea turtles on the entire Mexican Pacific coast. In addition, Don Chuy has actively participated in the design and field testing of modified fishing gear to reduce bycatch, particularly of loggerhead turtles in the Gulf of Ulla.

We hope you like the names and good luck with the project!

Aloha George,

HAWAIIAN N=5

Please find 5 possible turtle names below which have some connection or symbolism with the Japanese culture.

Hawaiian names for the Honu:

~~X~~ 1. Pua-sakura...Sakura blossom

DUP W/ JAPANESE  
LARRY = LAWI

~~X~~ 2. Ka Lā 'Ula...Red Sun (red is a sacred color for the Hawaiians and a color loved by the Japanese. The Red Sun could also serve as a symbol for the Land of the Rising Sun)

~~X~~ 3. Kai Malino...Calm and peaceful seas. (Kai is a word in Japanese meaning ocean, shell and also restoration & recovery. In Hawaiian, Kai refers to the sea. This word carries similar meanings for both the Japanese and the Hawaiian cultures. Kona on Hawai'i island has a famous saying, Kona kai malino, Kona of the calm seas.)

~~X~~ 4. Akamai...Smart and intelligent. (The word akamai in Hawai'i refers to one who is smart and intelligent. The Japanese word atama-i (sp?) refers to an intelligent head or mind.)

~~X~~ 5. Hau'oli...Happiness (Happiness is a good virtue in any culture)

Hope that these Hawaiian names with Japanese connection will work out. Let us know if it doesn't and I can look at other options.

Danny & Anna
