**Shortened head  
頭部の短縮**

# Rounded body with a shortened head

## 頭部短縮を伴う丸みを帯びた体型

Shortening of the head was noted; however, the overall body conformation, including the head, was rounded, with no abnormalities in behavior or appetite. The condition was considered not to interfere with daily life.

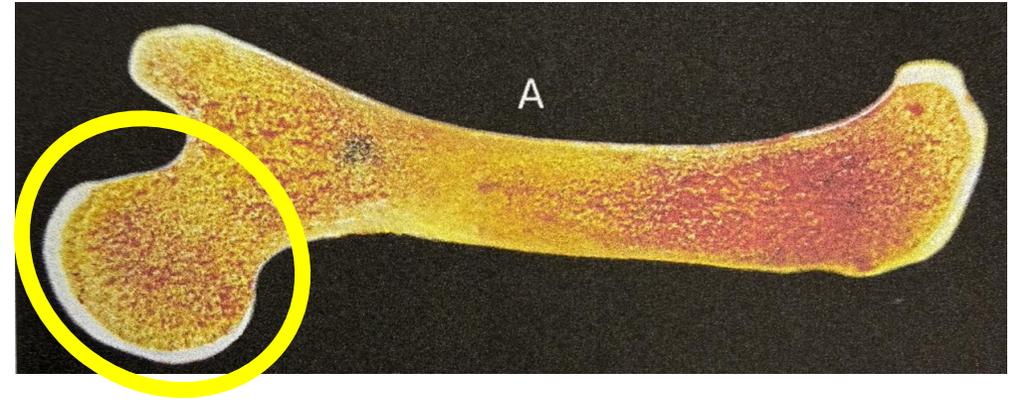

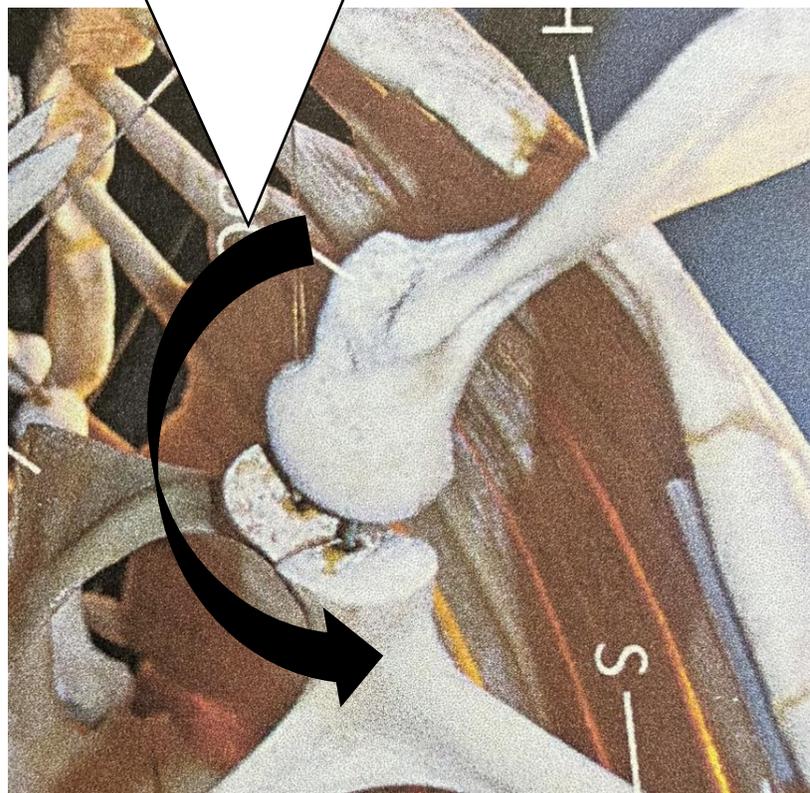

頭部の短縮に加え、頭部を含め体格は丸みを帯びている。行動および食欲に異常はなく、生活に支障はないと判断した。

# Dislocation and torsion of femoral head

## 大腿骨頭の脱臼と捻転

Twisted after dislocation  
脱臼後に捻転

On the DV, the femoral heads (normally superimposed) were visualized without superimposition due to torsion.

背腹方向像において、捻転により通常重複して描出される大腿骨頭が重複せずに描出された
