Re: Cohort IV- The Time Has Come Again to Attach at PNPA!

From Cali Turner - NOAA Federal <cali.turner@noaa.gov>

Date Fri 5/22/2026 10:14 PM

To Laura R Jim <laura.jim@hpa.edu>

Cc Marc Rice <mrice@hpa.edu>; Alberto Abreu <alberto.abreu@ola.icmyl.unam.mx>; Larry B. Crowder <lbcrowd@stanford.edu>; honu world <itsahonuworlindhawaii@hotmail.com>; Google Groups STRETCH <loggerhead-stretch@googlegroups.com>

Hi Laura, I would support this naming idea. Very thoughtful of you to consider and suggest to the group.

And I've heard back - enthusiastically - from the 5th grade class at Bay Park Elementary here in San Diego with 5 name suggestions. Again, I've been able to present our STRETCH work to this class for the past 3 years, where they've seen and considered the paths of each previous cohort. They said they would be so honored to be able to provide (some / all) of the US West Coast's turtle names. Please see below the list of names they came up with, all west-coast inspired:

- ✓ Sunny
- ✓ Diego (for San Diego)
- ✓ Torrey (for the very rare pine tree found only in San Diego and on Santa Rosa Island)
- ✓ Miller (for a favorite player on the class' favorite team - the SD Padres, MLB)
- ✓ Claire (for where the school is located, Clairemont)

Thanks for considering these names! The class and teacher are very excited about this possibility.

All the best,
Cali

Re: 5 Names from Hawaii

From 森 昌範 <m-mori@nagoyaminato.or.jp>

Mexican Names for Cohort IV $N=5$

From George Balazs <itsahonuworldinhawaii@hotmail.com>

Date Sat 5/30/2026 5:15 AM

To George Balazs <itsahonuworldinhawaii@hotmail.com>

Sorry, I can imagine you want everything in order and in time... I have been going back and forth with Grupo Tortugero to adopt names of young luminaries working with loggerheads but very few are doing so due to the politics involved OR would rather not be mentioned. I do have 5 now...

Re: Re: Your last measuring & weighing of Cohort IV

From 森 昌範 <m-mori@nagoyaminato.or.jp>

Date Sun 6/7/2026 12:42 AM

To George Balazs <itsahonuworldinhawaii@hotmail.com>

That is correct. Cohort IV consists of a total of 30 turtles: the 28 turtles originally planned for Cohort IV plus two additional large individuals (approximately 50 cm SCL).

Of the two added turtles, one is the individual that was used in the mock tag test (a remaining turtle from Cohort II; Inconel tag number 5333), and the other is a remaining turtle from Cohort III (Inconel tag number 51777).

0.4g per vial

Laura and I have weighed out 15 more vials of UV ACTIVATOR and she will bring them. I would be tempted to use 1 ones Laura brings as we know where they were stored and they are generally newer... I don't know where the others were stored but they will probably be fine... new ones first though.

Re: Activator power?

From Marc Rice <mrice@hpa.edu>

Date Tue 6/9/2026 10:41 PM

To George Balazs <itsahonuworldinhawaii@hotmail.com>

Cc Laura R Jim <laura.jim@hpa.edu>

actually it is .4 gr/vial

Here is how I calculated it:

They sell it in 7 gram packages for 1 gallon of resin

there are 3785 ml per gallon

Or .002 gr/ml

our 200 ml resin cans then would need 200 ml X .002 gr/ml =.4 gr
